

World Anti Drug Day: DR. PC JAIN

As desire by you on the eve of International Drug Day ,26 th June .I am submitting this articles with short stories which co relate crimes and drug Addictions.This article can be a help for UNODC campaign .As the there is increase use of illicit drugs there is increase in numbers of various crimes including murder,rape,domestic crimes etc.

There is a saying in Sanskrit language that"Buddhir lumpanti yed vastuon madkari taduchate.) Meaning thereby that any substance. Which impairs mind is called addictive substance.So most of the crimes are committed under the influence of such drugs which impairs mental functions.

Crime rates has increased to 50.5 from national average of 3.8 in punjab India in year 2014 when use of drug Heroin was more prevalent so is also in most of the countries.

These Little Tales of Addictions shows a close relationship between crimes and drug or alcohol Addictions.

1.Bottle on eye ball.

One day when I was sitting in my clinic in the evening at about 7.45 pm one driver came with bleeding from his one eye with severe pain and weeping.I asked the fellow driver he narrated the story that when he was driving four young fellows who were fully drunk brought their motor cycle in front of their truck and just not giving side to the truck ,they were unable to drive the motor cycle properly as they were swinging their vehicle.This man asked them to give side which they did not gave.on the contrary they stopped their motor cycle so the truck was stopped .One of these young drunken youth broke the glass drinking bottle and while talking to this driver pierced this Bottle into one eye leaving him weeping and bleeding.I immediately referred him to eye surgeon after doing primary dressing.This is how the drugs and alcohol leads to crimes in the society.

2.Grand Mother beaten -

This grand mother of about 65 yrs old came to me ,while talking she was weeping because she was beaten by her grand son under influence of alcohol.Her only daughters husband died in accident who had a son of 5yrs .She brought with her and now taking care of this child now of 16yrs.Here the another grand son of his son was always jealous of him often abuse her under alcohol that remove this boy otherwise he will capture the whole capital.so one day when was fully drunken came with a wooden stick beat the grand mother.See how alcoholics drugs commit such crime.

3.Two widow sisters.

One sister whose husband died due minor scuffle while fully drunk and beating some one fell with head injury which lead to his death.Another sister husband a regular quarrelsome personality when drunken was knifed to death.both now widow.one sister came because her only son now follows the path of father is now a alcoholic and tobacco addict and Mother do not want to lose her like his father

4.Mother hanged.-

One young addict of heroin always demanded money from his widow mother for this addictive substance .She sold her most of the belongings for his ever increasing demand of drug .But how long she could have done this.

One day in afternoon this boy demanded money for heroin purchase which she did not have ,he beat the mother then removed her sari(long cloth worn by Indian women to cover her body) and tied this around her neck while she was crying for help to save life.he lifted her body to be hanged. ,she became almost unconscious and the neighbor came to rescue her ,saved her.Such kind of criminal attempt can only be attempted only by person under the influence of drug.

So all these stories links close relationship between crime and the illicit drugs.So only solution lies in control these drugs by authorities and make the constant public awareness programme from the primary school.to college.level to reduce these crimes.

Sarangdevot appreciated the work done by Mahavir International for the treatment of free medical, education, helpless and disadvantaged sections and said that human service is the biggest service. He said that the university is ready to help all types of assistance related to the main stream of the disadvantaged sections.

Grand Golden jubilee celebrations of Aachrya Shree Vidyasagar ji Maharaj

Udaipur: The celebrations of completion of fifty years of Digambar Jain saint Aachrya Shree Vidyasagarji's deeksha will begin on 28th June 2017 as 'Sanyam Swam mahotsav'. This will conclude on 30th June 2018. It is to be noted that the Champaran Styagrah by Mhatma Gandhi covering Swadeshi and Janjagaran will be completing its 100 years in 2017. Aacharya Shree Vidyasagar ji Maharaj, 72, is such a Digambar Jain Aacharya who is closely associated with Meditation and Human welfare. After his Deeksha, for the last 50 years he has been a central point of reverence for millions. During the year long celebrations many activities of human Welfare, cultural and religious programs will be organized in various towns and cities. The main program will be held on 28th, 29th and 30th June 2017, in Dongargadh (dist: Rajnandgaon) of Chhatisgad, where the great saint is presently staying. The celebrations will be attended by more than one lac of his followers from all over the country and abroad. Those followers, who will not be able to witness the grand celebrations at Dongargadh are busy

in preparing to celebrate in their towns and cities. On this memorable day Prabhat Feri (morning Processions) will take place in all important Jain temples and the musical worship of Aachryashree will also be organized. Mass Plantation will also take place. Fruits and other materials will be distributed in Hospitals, orphanage and old Homes. Food and clothes will also be distributed to the needy.

Achryashree Vidyasagar Ji Maharaj

Acharyashree Vidyasagar Ji Maharaj, was born on the Holy occasion of Sharad Poornima the 10th Oct 1946 in Sadlaga village of Belgaum dist of Karnataka. When he was 22 he adopted Pichhi Kamndlu and renounced all worldly materials.

After Deeksha he always walked on foot without using any vehicle. During the 49 long years of his sainthood Acharyashree continued to flow the spiritual Ganga by traveling barefoot thousands of kilometers in Maharashtra, Gujrat, Chhatisgad, Madhya Pradesh, Rajasthan, Uttarpradesh, West Bengal and Bihar. With his spiritual

efforts millions of people gave up intoxication. Acharyashree also made successful efforts to strengthen the national integration. When he used to walk in villages, people of every walk of life used to gather in crowds and create a scene as if the great Bhagwan Mahaveer himself is walking there.

Even when the thorns pierced in his feet or ulcers there, his travel was uninterrupted and continued. He never used to disclosed his programs. In real sense he is a saint of the masses. Impressed with greatness of Acharya Vidyasagarji, his mother, father and two younger brothers Anantnath and Shantinath along with two

sisters Suvarna and Shanta also adopted deeksha. Achryashree Vidyasagar ji Maharaj sleeps only for a short while, on hard wooden Takht without any mattress or cover. He is an early riser and wakes up at 2 AM. He is staunch follower of Jain Muni code of conduct and accordingly takes food and water only once in 24 hours through hands (Panipatra). His food excludes green vegetables, milk, salt and sugar.

Strong supporter of public welfare and Swadeshi With the inspiration of acharyashree more than 100 Gashalas (cow shelters) are being operated in various

places mainly of Gujrat, Mdhyapradesh, chhatisgad and Maharashtra. He is also instrumental in reconstruction of many places of pilgrimage and the places are decorated with art of sculptures. A modern hospital with all modern amenities, 'The Bhagyodaya Teerth Chikitsalaya' is also in operation at Saugor.

A strong supporter of 'Stree Shiksha' (Women Education) and education in mother tongue With the holy inspiration of Gurudev, Model Girls' school with boarding facilities are in operation with the title 'Pratibha Sthai'. Where preferred attention is given for all round development of the girl students.

With such efforts these schools affiliated with CBSE are giving cent per cent results and all the students pass in first division. Contrary to the common trend of English medium, these schools are providing education through Hindi medium.

As per the principle of Acharyashree the education in all the developed countries is provided in their own mother tongues. Acharyashree is of the strong opinion that education through Hindi medium helps in developing mind of the student without any hindrance. They also develop tendency for use of new methods and capacity to innovate with scientific approach. According to Acharyashree all educationists and the UNSCO are also supporting education in mother tongue.

Self reliance through Hand looms and Swadeshi With the inspiration of Achryashree the hand looms are being started at various places. Which is promoting use of 'Khadi'. A better class of clothes are being manufactured which provides large scale employment and promoting Swadeshi. These hand woven clothes are completely non violent and skin friendly.

A Revolutionary with a Gun in One Hand and a Pen in Another: Che Guevara

Dr.H.S.Chandalia

Ernesto Che Guevara is the icon of the youth in the world today. Every young man or woman who aspires to bring justice and equality in the world gets inspiration from Che. Thousands of young men and women wear shirts with Che's photograph printed on the chest or back. Many of them may not have even heard of him yet he holds a place in their hearts and they take pride in putting on a shirt with this bearded revolutionary. Ernesto Che Guevara was the hero of Cuban revolution and fought as second-in-command during the battle as also after the revolution in the reconstruction of Cuba as a socialist country in the leadership of Fidel Castro.

Ernesto Che Guevara was born on June 14, 1928 at

Rosario, Argentina. He studied medicine before traveling around South America, observing conditions that spurred his Marxist beliefs. He aided Fidel Castro in overthrowing the Batista government in the late 1950s, and then held key political offices during Castro's regime. Guevara later engaged in guerrilla action elsewhere, including in Bolivia, where he was captured and executed in 1967 by American secret agency and the ruling government of Bolivia.

He studied in a school and passed with an honours. Later he studied medicine at the University of Buenos Aires. In 1951 he left the school to travel around South America with a friend. The poor living conditions he witnessed on their nine-month journey had a profound effect on Guevara, and

he returned to medical school the following year, intent on providing care for the needy. He received his degree in 1953. Same year he travelled to Guatemala and witnessed how the leftist government of Guatemala was overturned by CIA, the US intelligence agency. He decided to abandon his career in medicine and work for revolution in South America so that justice for the people could be achieved. He joined Fidel Castro and fought a guerrilla war to overthrow US supported Batista government in Cuba and formed a socialist government in Cuba in the leadership of Fidel Castro. Many of the admirers and critics of Ernesto Che Guevara may not have noted carefully that while he held a gun in his one hand he held a pen in another. Che was a prolific

writer and wrote even when he was facing gun fire from a helicopter hiding in some barn fighting the enemy. He was an efficient war strategist who defeated US supported Batista government with a handful of revolutionaries. Che wrote about his experiences in the form of diaries and notes. The last entry in his diary was written less than twenty four hours before his brutal murder by CIA and the Bolivian troops.

The Motorcycle Diaries, Reminiscences of the Cuban Revolutionary War, Guerrilla Warfare-a Manual, The African Dream and The Bolivian Diary are some of his writings which tell us the man behind the great guerrilla fighter. A reading of these books would be very meaningful to understand him in the present times.

World of Gem-stones

Hritu Sodhi

Thousands of minerals are available on our entire planet But only one of them is put in the category of Gemstones. Before giving the place of Gemstone to any mineral, it is very important to have some characteristics in it. The beauty of Gemstones is pegged with color, cut, clarity, luster and some very special optical effects, thereby fixing their value in the world market. Generally, jam stones are divided into categories of pressure and semi-pressure stones. But the World Jeweler Confederation has divided them into Color Stones, Diamond and Pearl categories so that their proper classification can be done. Trade associations around the world consider this to be right.

While beauty makes Jam Stones designable, the reduction in the rarity i.e. leads to a step further in the world.

How are the Gem Stones made?

Most Gemstones are made from geological process in the form of rock in the womb of the Earth. In addition, a rock changes into another rock even when James Stones is formed.

Where Gemstones such as diamond and pearls formed like a part of the rock on the freezing of magma, on the other hand the remaining gases and magnesium remaining on the other side are stored in nearby rocks or cavities, such as Emerald, Aqua Marine, Topaz, Tramlane Make jam stone. Emerald Quartz and Black Truffle are Associated Minerals from each other. Some are made of gems such as Pearl, Shell, Amber, Coral, Coral etc. Biological processes.

Jem Stone Mining:James is minted with two types of deposits.

1. Primary Deposit

2. Secondary Deposit

The first method speaks hard rock mining and the other also speaker mining.

Drill and blasting large rocks in hard rock. Mining are removed by jam bearing rocks, which are crushed and then James Stones is sorted from it.

This method is also used for Emerald. In the same way, they are also extracted by open cast mining and terrace mining, marine mining.

Crushing is done to make it easier to remove small jam stone from big rock. Washing is done after crushing. Crushed rock stones are sent for the extraction.

Extraction - James Stone and other minerals which sit down in the strainer are sorted by hand and separated. James Stones also separates the pieces of small hard rock with hand. James Stones is removed by breaking these small pieces with a hammer. These crystals are sorted differently according to size, shape and quality. They are sent to the Gem Processing Center for cutting processing and polishing. In Rajasthan, James Stones' business is done at a very high scale. Here, by sending gems to the special Gem Processing Center located in Jaipur, they are prepared for processing in the market by doing processing, cutting and polishing. The gems found in Rajasthan are mainly the Gemstones under the Beryl range. The gem will be as big and beautiful and after its polishing, the rarity determines how high it will be sold in the market. Judges judge with the qualities of durability, hardness (ability to withstand his scratches), brilliance (cleavage tolerance), cleaves (ease of burst) or with the effect of chemicals and heats. Jam Stone which does not fit these characteristics, they are cut and polished only for collection. durable stones are only used to make the jewelry. Jewelry made from Gemstones is very popular nowadays. The value of the Natural Stones is higher than synthetic. It is also responsible for the attachment of the stars to gems of stars. The general public demands such a jewelry by looking at their choice. Nowadays this industry is flourishing.
