Stemcell Therapy : A New Hope of Treatment for Incurable Autism Disorder & Other Neurological Disorders

Udaipur: NeuroGen Brain and Spine Institute, based out of Mumbai and is India's leading Stem Cell Therapy Centre that offers a comprehensive approach for children with Autism Spectrum Disorders. Till date, NeuroGen has already offered treatment to over 1000 autistic kids from across the globe. Autism Spectrum Disorder (ASD) is one of the commonest childhood neuro-psychiatric disorders. In the USA the incidence of Autism is 1 in 68 children. In India, it has been reported that 1 in 250 children have Autism and this number is increasing with better recognition and awareness of the condition. The shock of finding out that one's child has autism is life-changing experience for most parents. Raising a child with autism is a constant challenge for parents and especially for mothers as it's exhausting, exhilarating and a lonely roller coaster ride. Autism is a childhood disorder that results in speech problems, hyperactivity, aggressive behavior and difficulty in social interaction. Presently over one crore children in India are affected and being treated with drugs for symptomatic relief, special education, occupational speech and behavioral therapies. There are certain disorders, where despite the best available medical and re-

habilitative treatments, till date, medical science has not been able to give the patients satisfactory relief in their medical and physical symptoms or help them to regain the abilities to integrate with society. Autism is one such disorder. Dr Alok Sharma Professor & Head of Neurosurgery, LTMG Hospital & LTM Medical College, Sion Mumbai and Director NeuroGen Brain & Spine Institute said "A look at the development of the advances in the medical sciences shows that the solutions to difficult untreatable disorders have always come from a multi-disciplinary approach. It is only when people from different specialities pool their knowledge, skills and resources, that breakthroughs happen in incurable or difficult to treat medical conditions." Dr Nandini Gokulchandran Deputy Director & Head Medical Services, NeuroGen Brain & Spine Institute said "Autism causes impairments in higher mental functions and causes the children to be hyperactive and aggressive and so affects their social interactions.

Speech, language and communication skill are severely impaired. These children cannot go to normal schools and are completely dependent on parents and caretakers for activities of daily living. Having a child with Autism severely affects the emotional, social and financial aspects of the entire family. It is more commonly observed in boys than girls. The onset of symptoms is generally noted before the age of 3 years in children, although in many cases it is noticed at a much older age. The exact etiology and pathophysiology remains poorly understood, however research has pointed to several possible factors, like genetics (heredity); metabolic or neurological factors, certain types of infections, prenatal or post natal environment, etc." During press meet a case report of Master Adnan Tabran who is a 7-year-old male and a known case of Attention Deficit Hyperactive Disorder (Autism) from Udaipur. Was presented. There were complications during the 9th month of pregnancy period of Adnan's

mother, hence Adnan was born 8 to 10 days prior from due date with the help of Induced labor technique. He cried immediately after birth and no complications were reported post that. He achieved all his visual milestones age-appropriately. His motor and speech milestones were delayed. He started walking at the age of 16 months and speech developed in monosyllables at 3 years of age. His arm hand control and personal social development was delayed and achieved at around 3.5 to 4 years of age. "When Adnan's age was around 2 years, we noticed that he is too hyper and restless and his learning is not appropriate as compared to children of his age. We used to try and control him through different methods but none of the methods worked for more than 5 to 10 mins and again he used to start running around. 2 years ago when Adnan was 5 years old, he was shown to a psychologist in Ahmedabad where he underwent psychological assessment. Based on clinical picture and investigations, he was diagnosed with

ADHD and speech delay" said Mr. Tabran, Adnan's father. Mr. and Mrs. Tabran came to know about NeuroGen from internet when they were searching about different medicine options for Autism (ADHD) in March 2016. Adnan came to NeuroGen Brain & Spine Institute in December 2016 to undergo Stem Cell Therapy and Neuro-rehabilitation. At NeuroGen, Adnan underwent Stem Cell Therapy along with a customized rehabilitation program. The aim of the rehabilitation program was to develop cognition and understanding, therapies to reduce the hyperactivity and to increase the concentration, sensory integration, command following and to increase overall intellectual ability of the patient. He was given exercises that would help him improve his understanding, address his behavior, sensory and motor issues. He was given a combination program with occupational therapy, physiotherapy, speech therapy and psychological counseling under the guidance of the most experienced professionals in the field.

Improvement in Mahak

Udaipur: Biological Garden Sajjanganh lioness Mahak is improving as she was sick for a week. The team of wildlife medical experts is constantly monitoring the state of the Mahak. A team of local veterinary practitioner Karamendra Pratap Singh, Nahargarh biological park, Jaipur, Dr. Arvind Mathur, Machia Biological Park, Jodhpur & Dr. Sharavan Singh Rathore, continuously monitoring and intensive treatment of "smack" blood samples and creatinine levels were observed during treatment. Blood urea is being tested. A blood sample of Mahak has been sent to the Indian Veterinary Research Institute, Izantnagar, Bareilly, which can lead to the best and long-term treatment of Mahak after quality testing. On Thursday, a blood sample of "smack" was taken and tested in the local laboratory, according to which the level of Creatinine was found to be less 5.1 compared to earlier and blood urea levels were also reduced from earlier to 142. Which indicates the health condition of 'client' is improving & now is normal.

Organized the Children's Kavi Sammelan

Udaipur: The Universal Senior Secondary School, Fatehpura, organized 'Children's Children's Kavi Sammelan as an Inter School Competition in joint collaboration of All Religion Friendship Association, Rotary Mewar in Udaipur. Initially Rotary Club of Mewar, Dr. Arvinder Singh, Sarva Dharma Maitri Sangha, Sandeep Singhvada, director Father Norbert Harman performed the lamp lighting ceremony. Secretary of Rotary Mewar Abhay Malara welcomed the Chief Judge of the competition, Mushtaq Chanchal, Abdul Hamir Bharti, and Zafar Mohammad. Dr. Arvinder Singh, president of Rotary Mewar, said that about forty schools of children participated and presented their beautiful poems forced audience to clap. In the junior category competition, The Universal Schools Ruchika Rathore's poem, 'kahatee hai nanheen see baala, main koe abhishaap nahin' evan da vijan ekedamee ke meemaansa paraasae ne jimmedariyon ka bojh parivaar par pada to, got first prize while second prize gone to "Scholar Arena Harshvardhan Singh Panwar for his poem yagy anantarsa dhadhak raha tha, Third award was conferred to Sankhishri Ranavat of Saint merry school Titardi The first place in the Senior category, Soumya Bhatnagar of The Universal Senior Secondary Fatehpura School, was awarded for her poem, " chaaron taraph ujala par and heree raat thee," second place, was given to the Vidushi Jain of the Scholar Arena & the third place is for Soumya Vyas of Maharana Mewar.

Localities' shared with foreign culture

Udaipur: Languages and dialects may differ slightly, even after slightest hesitation to talk to each other, understand each other's emotions, strayed, laughing, willing to know the history of Mewar, using the puppets to understand story of Maharajas, ate food together and then promised to get back The memories were seized by capturing them in the camera through selfies. Some laugh -joking together with each other, getting to know something from each other - teaching, explaining affection and then separating all these colors are seen in the Lions International Youth Exchange's three-day Culture Confluence Program. Former ambassador of the program Lions Club Anil Nahar told that 21 children from 8 countries came to Udaipur for exchange of culture and to get the history of Mewar along with 110 children of Dhol ki Pati School, adopted by Lions Club. On the last day of the program, when separated, the children were very upset. They calm their curiosity with foreign children about their drinking, living conditions etc. Along with this, foreign children also shared the three-day experience, saying that the history of Mewar itself is grave and glorious, its culture, colors here and its flags are very unique in itself. Coming to Udaipur is very exciting for them. Lions Club Udaipur President Kishore Kothari told that with the help of culture, the children of 110 children of Dhole Pati, went by trekking to Mahakal in the morning & visited Gupteshwar MahaDev, and from there, all the children reached Pratap Gaurav Kendra, where the mechanical gallery, Sauri Ghargha Seeing the documentary based on Pratap's life, Bharat Mata's philosophy set the image of Great Pratap. At Pratav Gaurav's center everyone ate together while eating. From here all the children arrived at Bhartiya Lok Kala Mandal where they enjoyed the show of puppet. Prasun Bharadwaj shared his views with us and said that while going to the lower course of the program, all the children also saw the celebration mall in heritage look.

"Angioplasty through IVUS a boon for renal failure"

70 Years old man who was in emergency conditions of renal failure and heart attack which required immediate medications was brought to Geetanjali Medical College & Hospital, Udaipur. The patient then underwent Angioplasty without the use of contrast and with the help of latest technology of IVUS (Intra-Vascular Ultrasound Sonography) which claims to be the first successful case in Southern Rajasthan's Medical History. The team of Cardiologists of Geetanjali Cardiac Centre included Dr. Ramesh Patel, Dr. Harish Sanadhya & Dr. CP Purohit and Dr. Nikhil & Dr. Lokesh Prajapat assisting the case. Dr. Ramesh Patel said that heart attack, blockage of more than 80% in heart's arteries and

renal failure lead the admission of patient at GMCH. On treating the blockage of first artery, the contrast of angioplasty contradicted allergic reactions to the patient. The patients suffering from renal failure could never be treated of heart blockages with contrast through angiography or angioplasty. Later, it was decided to perform angioplasty with IVUS. The procedure took only 30 minutes to save the life. This technology will prove a boon for the patients suffering from renal failure. What is IVUS (Intra-Vascular Ultrasound Sonography)? Intravascular ultrasound (IVUS) is a medical imaging methodology using a specially designed catheter with a miniaturized ultrasound probe attached to the distal end of

the catheter. The proximal end of the catheter is attached to computerized ultrasound equipment. The arteries of the heart (the coronary arteries) are the most frequent imaging target for IVUS. IVUS is used in the coronary arteries to determine the amount of atheromatous plaque built up at any particular point in the epicardial coronary artery.

What if the procedure through IVUS could not be done? If any hospital is not having this technology installed then open heart surgery was the last resource available. Because angioplasty/angiography is performed through contrast which was leading to allergic reactions, said Dr. Patel. Also, open heart surgery was also very risky and complicated due to renal failure.

CM Yogi Adityanath met Acharya Lokesh

Exclusive meeting during first foreign tour of Chief Minister Yogi Adityanath and Jainacharya Dr. Lokesh Muni was held in Myamnaar. 'World Peace Conclave' organised in Mumbai and 'Vishva Maitri Diwas' were discussed in the meeting. Founder President of Ahimsa Vishva Bharti Acharya Dr. Lokesh Muni talked about 'World Peace Conclave to be organised on 13 August at NSCI Dome in Mumbai in the presence of H.H. Dalai Lama, Yogrishi Baba Ramdev, Acharya Lokesh Muni, different faith leaders and Central Ministers of India. He said that different faith leaders will give the message of World Peace and Harmony from one platform for the welfare of humanity. The time has come we dissolve differences and work for welfare of different sections of the society. Religious leaders and eminent people from India and abroad will take part in the seminar. Acharya Lokesh told Shri Yogi that 'Paryushan and Dahlakshan Mahaparv' based on great teachings of Bhagwan Mahavir will be celebrated with Tyag, Tapasya and Sanyam in different parts of the world from 5th August to 19th September. Entire Jain community will celebrate 'Vishv Maitri Diwas' after that through which Bhagwan Mahavir philosophy of Unity in Diversity, Harmony and Brotherhood will again be send to people. Acharya Lokesh also told Shri Yogi about the National Campaign against Alcoholism and Female Foeticide run by Ahimsa Vishva Bharti.

Chief Minister of Uttar Pradesh Yogi Adityanath appreciated that Acharya Lokesh Muni is working for the welfare of humanity by associating religion with social work.
