Successful operation of lungs in PIMS Hospital

Udaipur: In the Pacific Institutes of Medical Sciences (PIMS) Hospital, Umdda, doctors have successfully operated two children's lungs.

PIMS chairman Ashish Agarwal told that the 17-year-old Devkisan of Rajsamand and 8-year-old Harish of Girwa was successfully operated. There was a hydatid cyst on the right side of Devkisan, while the left lungs of Harish pus formation was observed. The family brought them to PIMS Hospital where the pediatrics lung surgeon Dr. Pravin Zanwar decided to conduct the operation. After the operation, Harish was kept for two days and Devkisan was kept under the supervision of Dr. Vivek Parashar, Dr. Rahul Khatri and Dr. Gaurav Dhadichin the Intensive Care Unit (ICU) for 10 days. Both children are improving day by day.

Wonder Cement awarded the Vriksha Vardhak Puruskar

Udaipur: Forest Department of Rajasthan awarded the prestigious Vriksha Vardhak Puruskar to Wonder Cement Limited for exceptional contribution in plantation during the closing ceremony of the 63rd Wild Life Week at Sita Mata Wildlife Sanctuary. The award was received by Nitin Jain, Vice President (Commercial), Wonder Cement from Mukesh Saini, DCF - Wild Life, Chittorgarh and MLA Gautam Lal Meena.

On this occasion forest department appreciated Wonder Cement for the green belt development in plant area, waste dump yard plantation in mines area, development of Panchfal Udhyan, and intensive road side plantation done under Green N Clean - Nimbahera program in nearby villages.

Nitin Jain reiterated the commitment of WCL for development of greenery in and around Nimbahera. In a very short span of time WCL have developed plenty of greenery. The Programme was attended by hundreds of children, public representatives and forest officials.

City Mandarinins Writing the City: City Stories Utsav-2017

On 14 October 2017, Department of English and Dean Student's Welfare of Mohanlal Sukhadia University organised day long City Mandarinins Writing the City, the CITY STORIES UTSAV-2017. Prof. Pradeep Trikha, Coordinator of the program

said that it was an open forum for dialogue in order to create space in the arena of ideas. It was a multidimensional event to bring out the vibrancy of the region's myriad cultures to build confidence, strengthen students' ability to communicate more fluently and offers

the opportunity to broaden cultural understanding of Udaipur. He added that the event like this is for those who desire to explore the city in order to dig out its stories that can reveal its culture, spirit, fragrance of the environment and similar such issues.

Participants from the institutions like JECRC, Jaipur and NIRMA University, Ahmadabad who had their roots in Udaipur also participated along with the students from the Pacific University and the host university.

Besides these freelance jour-

nalists, short story writers, members of the faculty also contributed their stories. In all the six stories were short listed to be read out by the respective writers. Prof. M.S. Rathore, Dean Students' Welfare said the first prize was given to Setu Bhatnagar for 'Udaipur Story' in English, the second to Gauri Kant Sharma's 'Guide Once Again' in Hindi, the third prize was shared by Swareena Jain's 'Through the Eyes of Blind' in English and Naveen Nandwana's 'Bhagwanti' in Hindi while Reena Menariya's 'Aur Jheelen hans padi' in Hindi was given consolation prize and a special prize sponsored by Prof. Sharad Sirivatava for narration was given to Sohandas Vaishnav's story

"Shooting" in Hindi. Prof. J.P. Sharma, Chairperson and Vice Chancellor pointed out that stories sensitize us and insisted that such like events should be organised by the University on annual basis. Prof. Sharad Sirivastava, Chief Guest said that the stories allow us to explore our creative potential. Prof. G. Soral, special guest and Dean, University College of Commerce and Management Studies said story writing bring sense of completeness in us. Prof. Seema Malik, Dean Post Graduate Studies said that a story transports us to another world. Dr. Minakshi Jain, extended the vote of thanks. The program was convened by Shivani Sharma and Vadehi.

"First Successful Hybrid Operation of Heart in Rajasthan"

Udaipur: Chittor resident Kailash Gayari (Age 2 years) was successfully operated for cardiac implant closure through hybrid surgery and percutaneous device. The cardiac team of Geetanjali Hospital included surgeons, cardiologists and anesthesiologists, namely Cardio Thoracic & Vascular Surgeon Dr. Sanjay Gandhi & Dr. Surendra Patel, Cardiologists Dr. C.P. Purohit, Dr. Harish Sanadhya & Dr. Ramesh Patel, Cardiac Anesthesiologists Dr. Ankur Gandhi, Dr. Kalpesh Mistry, Dr. Manmohan Jindal & Dr. Dharamchand Jain. He survived fighting all odds to be the first successful case of hybrid surgery in Rajasthan.

Dr. Ramesh Patel told us that the baby was having congenital heart disease, due to which the baby was getting sick frequently, and was prone to lower growth. Consultation & echo-cardiography investigation confirmed about the cardiac implant closure which was tried to close it by percutaneous procedure; (A percutaneous procedure is any medical procedure where access to inner organs or other tissue is done via needle-puncture of the skin, rather than by using an "open" approach where inner organs or tissue are exposed (typically with the use of a scalpel). But, due to anatomical complications of heart the patient was referred to the surgeon team for their intervention.

Dr. Sanjay Gandhi, cardiac surgeon, said that, "There were two treatment options available for the child to get treated; one was hybrid surgery and another open heart surgery. But, on discussions with our cardiologist's first option was opted to treat the child through hybrid technology. A hybrid procedure is a treatment of the patient discussed in a heart team and is a combined approach by the interventional cardiologist and the cardiac surgeon. The goal is to make the overall treatment of the patient more feasible and to reduce the risk." As a result, the successful surgery lasted three hours.

Dr. Gandhi also told that the procedure was complex as the hole in the upper surface of heart could lead to bursting of heart thereby resulting in death of the patient for which the heart-lung machine was ready. Incisions were made to provide access to the baby's heart or a major blood vessel, like their aorta. Then they worked together to put in a device to close a hole in the heart and placed a stent to improve flow through a blood vessel. To delay more complex surgery until the baby is older, when their health is more stable and the risks of the surgery may be lower, the treatment was chosen. A joint effort of Geetanjali's Cardiac Team & technology establishing a new milestone in medical history to save life of a two-years old child. The baby was operated for free under Rajasthan Government's Rashtriya Bal Swasthya Karyakram (RBSK).

Recharged five years ago Hand pump Gives water

Hand pump situated outside the Government school, Sisarma which used to become dry or give very less water five years ago. The school children & the shop owner of nearby used to suffer due water scarcity.

Then in the year 2012-13 the Rotary President Anubhav Ladia & Secretary Deepak Sukhadia nominated as honorary member Dr. P.C. Jain who is working for the roof top Rain water harvesting & shown him this hand pump. Dr. Jain persuaded the neighboring shop owners about the quality of rain water & took their consent for recharging this hand pump. In the same year this hand pump was joined by the pipes through the Dewas water filter. So whenever the rain occurs it got automatically recharged. So it got recharged every year since last five years. So this dead hand pump got revived. Today after five years the present president & the chartered president Dr. Ashish Bhatnagar & water man of Udaipur Dr. P.C. Jain declared this school the first school as "Varsha Jal Sarakshan Mitra" which has recharged any hand pump. Dr. Jain also said that every dry hand pump if recharged by this simple, cheap Dewas water system can give you water after recharge. This will increase the quantity of water & improve its quality also. Dr. Deepak Sharma stressed the need to save the natural resources for the future generations. Secretary Ashish Bhatnagar appealed to store & save the roof top rain water into the natural resources & also promised any help from the Rotary Heritage. The program was presided by the President Vasant Khamesra of Rotary club Heritage & explained the activities of the clubs to the students. Dr. P.C. Jain persuaded the students not to use Tobacco, Gutkha etc & save the water & keep the cleanliness every where. He recited two poems with students on save water & De addition.

Neuro Surgery - the success of treatment depends on care Dr. Deepak

Udaipur: In major accident possibility to save the injured after the operation of brain & when treatment is completed only on proper care at hospital or at home can save. The patient's life may get rest because of the injection in the injured area. This information was given by Dr. Deepak Mishra, Neurologist and Anesthesiologist of Washington Medical University in a press meet and later in interaction with doctors in concluding session of the two-day workshop on Udaipur Update in Neuro Critical Care on Sunday. Nearly two hundred doctors of the city participated in this conference. Dr. Deepak said that the patient should be taken to the nearest hospital as soon as possible due to head or spine injury in accident or any accident. The

patient's head or spine operation should start only on the arrangement to deal with all kinds of operations in that hospital. Some times, the condition of such serious patients changes on the operation table. Dr. Deepak told that the care and handling of the injured before and after the operation is important. This infection can be caused by any reason. Dr. Deepak described GBH American Hospital as a suitable hospital for this. Dr. Kamlesh Bhatt, Director, Critical Care, GBH American Hospital, in the workshop, shared the experience of treatment Dr. Ajit Singh, neuro surgeon, described the seriousness of the operation of the injured head and spine, saying that most such patients reach the critical condition. Many times, there is a change

in the situation of such wounded in 36 to 72 hours. There are times when more than one operation is also needed. It can be possible to save serious injuries several times from seriousness and timely operation. Interventional neurologist Dr. Tarun Mathur discussed the bleeding from the brain's arteries in the accident and the methods of preventing it from explaining the cause of the whole body. Group director Dr. Anand Jha said that the workshop was started by cutting the cake from Group Director Medical Services Dr. Dinesh

Sharma. During Dr. Uday Bhowmik, Dr. Tarun Rahlot, Dr. Gaurav Jaiswal, Dr. Rajendra Sharma, were present. BH's ICU and Operation Theater on American Standards. Dr. Deepak Sharma observed the medical, cardiac and neurotic of GBH American Hospital on Sunday. At the same time, he also took stock of the activities of four Operation Theater. After the observation he explained to the management that arrangement of ICU and Operation Theater is as good as arrangement is available in America's big and renowned hospital.
