## "IVF helped conceived a lady with prolapsed uterus"

**Udaipur:** Geetanjali Medical College & Hospital's IVF Specialist Dr. Pooja Gandhi has successfully performed an IVF procedure in a lady of age 46 years with a prolapsed uterus. The team of doctors includes Gynecologist Dr. Anjana Verma, Dr. Smita Baheti & Dr. Rita Saxena.

Dr. Pooja Gandhi said that the couple Bhagwan Singh (54

years) & Sushila Singh (46 years) on consultation at Geetanjali Hospital, the lady was investigated for ovarian reserve, which was very low and the male partner was investigated for semen analysis, which was normal. Also, the clinical investigations confirmed about the prolapsed uterus.

On performing hysteroscopy

uterus seemed normal from inside. So, it was decided to perform the prolapsed surgery with a team of gynecologists. The bladder of the lady was also down which was repaired and was then put in its own place. After this, with the help of IVF & ICSI procedures, an assisted reproductive technology (ART) used to enhance the fertilization phase of in

vitro fertilization (IVF) by injecting a single sperm into a mature egg, in assistance of Blastocyst Culture, a technique developed for in vitro fertilization (IVF), intends to maximize pregnancy rates. Embryos are typically cultured for 5 days (cleavage stage with 4-10 cells) before being transferred into the uterus. And, Laser Hatching a technology which helps embryos to attach to the womb of the woman to avoid abortion. This resulted in positive twin pregnancy. IVF pregnancy along with prolapsed uterus is a very rare situation, which was treated successfully at Geetanjali Fertility Centre, added Dr. Pooja Gandhi. Jaipur Resident Sushila Singh said that after 25 years of marriage the couple visited every hospital for infertility problems but were rejected due to the prolapsed uterus. Rather they were always suggested to remove the uterus.
