Mehra.

- Ashok Mathur Bhanu kumar Shastri no more

Udaipur: Senior Bharatiya Janata Party leader and former MP Bhanu kumar Shastri died here on Saturday. 93-year-old Shastri was ill for some time and admitted to MB hospital where he passed away at four o'clock in the morning. His mortal remains were consigned to flames at Ashok Nagar crematorium in the presence of his well-wishers including several political leaders. . From the establishment of the Bharatiya Jana Sangh to the Janata Party and then to the BJP, he served party and nation as city council, , the Deputy Chairman, the MLA, the MP, & Chairman of state Khadi and Village Industries CommissionIn 1975 he was the state president of the Jan Sangh, during the Emergency struggle. At the time of Janata Party's formation in 1977, it was to announce the merger of the party in the Jan Sangh Pradesh office of Jaipur. Shastri jee was known for his simplicity ,dedication honesty .he was close to veteran BJP leaders Rajasthan Chief Minister Vasundhara Raje condoled the death of the BJP veteran."I am saddened after knowing about his demise. I pray for peace to the departed soul and courage to the bereaved family members to overcome the shock," Raje said in a tweet.Rajasthan BJP chief Ashok Parnami also condoled the death of Shastri.

- Seed replacement - A Option for income Enhancement

tion is prevalent cropping system in the southern rajasthan and also in adopted villages of NAIP sub-project. Maize is a pre-dominant crop of these villages and mostly it is under rainfed cultivation .Wheat is a major rabi crop. Among oilseeds, mustard occupies maximum area and that too under irrigated cultivation. Gram is major rabi pulse and is cultivated across the clusters. The productivity of these crops in adopted villages was very low as compared to district and state average due to non-adoption of HYV's and improved cultivation practices. lack of knowledge,low risk bearing capacity, etc. Framers generally grow maize-wheat for their dietary requirement and sold surplus in market for An attempt was made to aug-

ment the productivity of existing crops by replacing local cultivars of existing crops (wheat gram, mustard, maize, paddy greengram ,pigeonpea , blackgram, etc.) with HYV's and hybrids. This intervention has made dent on productivity, income and livelihood of households. By this intervention the productivity of various crops increased from 22.3 to 162.6 per cent over baseline values. The additional production of 21144 tonnes of cereals, oilseeds, pulses and other crops were obtained. Due to this intervention the seed replacement rate in kharif crops reached up to 50 per cent and in rabi crops it is more than 85 per cent In operational area. In mazie 30570 demonstrations on hybrids were laid out in 6945 ha area. The maize productivity increased from14.67 g/ha to 33.36/ha. In first year (2008), maize hybrids were introduced in 1200 ha area and the productivity of maize increased by two folds, with the introduction of hybrids on large scale

By adoption of hybrids in maize farmers harvested on average 2.0g additional maize from 0.2 ha land. Thus, he earned additional benefit of Rs.2200/-from 0.2 ha. Inthis way farmers realizes the benefit of hybrids and now cent per farmers of operational area adopted hybrids

in maize across all the 10 clus-

Together with me: Live now

Sridevi's sudden death makes one thing clear ever again No

matter how smart, health conscious, medically fit, and resource-

ful you are when it comes to "HIS ORDER" even a heart attack

will kill you instantly without giving you chance to avail best of

medical facilities which are otherwise available at your call. I

Life is unpredictable. Nothing is permanent in this world. I have

seen many people who live in the world of ego, pride n greed.

They don't consider poor people as humans. Money, power

and fame are the key ingredients to get popularity in this world. But sometimes materialistic things make us cry because we

can't handle the pressure caused by these. My father died in

a road accident. We could not save him that day. Sridevi died

These are mere illusions. We take birth and die after complet-

ing our mission. Our journey of life depends on the positive or

negative thoughts and deeds which we create daily. It's a fact

that we don't realise the importance of life before we lose any-

one close to our hearts. Ego and anger have overpowered most

of us. We are not ready to look beyond our families. Mostly

people live for society and the fear of getting abandoned by

the society make them real cowards. Their lives revolve around

few people only. God has given us the power to create happi-

ness in this world. Unfortunately we are creating happiness for

our families only. Husband, wife and two children or sometimes

single child is considered as a family. This wrong concept is

spreading so fast that trust and faith have lost their meanings.

We can create good causes so that world can remember us

after death. Film stars work hard and most of them do social

works to improve the situation of weak people. Sridevi's untime-

ly death teaches us to give up ego in relationships. No matter

how much expensive costumes we own, our real costume is

the soul which never dies. Share feelings with your friends and

talk right now to those whom you have not talked since ages.

Leave wrong habits of hurting and teasing on simple issues.

Give time to those who live only for you. Some people ignore

their loved ones to please society and one day only your loved

ones remember you with tears in eyes. Society remember us

by the money and power but our near and dear ones need

respect and affection only. We should spend quality time with

family members and spend some part of our income on soci-

ety's welfare. Death is renewal of our promises and evolution

of souls. Learn from this and grow with each passing day. Live

as if it is the last day on earth. Don't leave others, leave the

habit of nagging and ignoring.

Live now together with me.

due to heart attack. She was not saved by the doctors.

was reading these lines on social media sunday morning.

, additional production of 12981

tonners of maize was obtained

.As a staple, every farmer cul-

tivates maize in 0.4 to 0.8 ha

In wheat 3282 ha area was brought under HYV's across all the clusters and the productivity increased from 20.71g/ha to 37.91g/ha .The increase in productivity was due to introduction of HYV's and improved cultivation production of 5644 tonnes were recorded. Majority of farmers in operational area replaced their existing varieties of wheat (lok-1 and local seeds) with new HYV's and also adopted improved cultivation practices This intervention provided them average additional production of 1.5 to 2.0g from 0.2ha area. Demonstrations on mustard crop were laid out in 1677 ha with HYV'S and improved cultivation practices. The productivity of mustard enhanced from 9.42q/ha to 15.01q/ha. By this intervention additional productivity of 937 tonnes of mustard obtained.

In gram HYV's (Pratap Chana -1, GNG-469, GNG-667) were introduced in 275 ha area and 46 per cent increase in vield was recorded. About 33 per cent farmers adopted these varieties in operation area. This intervention provided additional production of 127 tonnes of gram. HYV's of barley crop was introduced in 215 ha area, where irrigation water was constraint and this gave additional benefit of Rs.3.5 million. In non -traditional area like Mavli –I & Dungarpur clusters clusterbean crop was introduced in 81.6 ha area and additional return of Rs.1.2 million was obtained by farmers. Bt. Cotton was introduced in

98.5 ha area with 349 farmers. In demonstrations average productivity of 22.34g/ha was obtained . Looking to the success of cotton cultivation in Mavli-I more farmers are adopting this new crop. In Abu Road and Pindwara clusters castor hybrids (GCH-5 and GCH-7) were introduced in 140.7 ha area and this intervention increased castor yield by 60 per cent over con ite varieties. Additional production worth Rs.6.2 million was obtained due to this inter-

At present 40 per cent farmers have adopted castor hybrids in both the clusters. Quality seeds and crop diversification brought prosperity to Dharm Lal Gadari A small farmers of village

Bhimal (Mavli-I) Sh. Dharm Lal Gadari S/O Nathu Ji Gadari

with one open well. Due to fragmented and undulating land holding he cultivated only 3.0 ha land in kharif season and 1.5 ha in rabi season. Before NAIP intervention he grew maize and wheat. After Rs.20-25 thousand in a year. perity to him through seed sification . After NAIP interseed of wheat with HYV Raifrom 0.2 ha (1 bigha) land whereas earlier he could harto the potential of improved varimaize in 0.2 ha and harvested 8.5 g maize whereas earhis all fields. By adoption of scistarted Bt. Cotton cultivation and is harvesting cotton of value Rs.25000/- from 0.2 ha. With increased income he purchased more buffaloes and now he is having 15 buffaloes. He also purchased all necesdug tube well and constructnow I have bank deposit of

to NAIP for this change" **Prosperity due** to cotton cultivation - Bheru Singh

Rs.1.0lakh and my yearly net

saving in Rs.1.5lakh. Thanks

For Bheru Singh, a small farmer of a village, Jharna opportunity to became rich farmer. He has 1.5 ha agricultural land hardly fulfilled needs of family by growing maize and wheat with traditional practices. According to him he never produced surplus more than 3-4 q wheat and 2-3 q maize in his life prior to NAIP. By the use of HYV's and scientific cultivation practices, he is produced 50 q surplus wheat and maize. He had

fulfilling his family requirement he hardly sold cereals worth To fulfill his family's need he purchased 5 buffaloes by taking loan from money lender and bank. But NAIP brought prosnever seen such bumper production and never dream of it. replacement and crop diver-Looking to the bumper yield of maize and wheat he desired vention he first time replaced for cash crop. Under NAIP, support was provided to him for 3077 and harvested 11q wheat Bt. Cotton cultivation. He cultivated cotton crop in 0.12 ha area and harvested cotton worth Rs. 20000/- Thereafter vest only 4-5 q wheat form same piece of land. Looking , he adopted cotton cultivation in more area eties, he introduced hybrid Now he raises cotton seeding in polyhouse prior to monsoon and transplant in the field after lier productivity from same onset of monsoon. Looking of piece of land was only 3.0-3.5 the success of cotton crop more than 205 farmer adoptq. He decided to adopt only HYV's and hybrid of crops in ed cotton cultivation, whereas earlier no farmer was cultivatentific cultivation practices, he ing this crop. Due to adaption achieved productivity of wheat 65q/ha and maize 54q/ha. He sary farm implements, bike, ed new house. His wards are studving at Udaipur. In his own words "Earlier I had debt, but

of cash crop and quality seed along with improved cultural practices he became prosperous and his annual income from agriculture is more than Rs.1.8lakh HYV's of crops changed living

standard of Kalu Damor A matriculate tribal farmer of village

Himmatpur (Bichhiwara) Sh. Kalu S/O Sh. Bhanti Damor owns 1.0 ha cultivable land His family member were

engaged in farming with traditional practices and he migrated to Gujarat for labour work in cotton field . His family normally grew maize, pigeonpea, blackgram and wheat for their dietary need. In the year 2007, he first time took HYV of wheat, Raj-3077 in 0.2 ha under NAIP sub-proiect and harvested 15 g wheat. whereas earlier he got only 6-7 q wheat grains from piece of land.

Looking to the results of HYV's he decided to stay in village and practice agriculture with improved technology. In Kharif 2008,he took hybrid maize and reaped productivity of 60g/ha. Thereafter, with the help of HDPE pipes he increased cropping intensity and also diversified existing cropping system. In Kharif season he grow maize

(0.3 ha), castor (0.3 ha), turmeric (0.1 ha), Bt. cotton

seed production (0.1 ha) and fennel (0.2 ha), and in rabi he grow wheat (0.5 ha) with improved production technology. He also grow vegetable in 0.2 ha in summer season. He said this income has increased six folds by adoption of HYV's and hybrid within 4 years' time (24000 to 150000/- per annum) and sending his 3 kids in good school for better education. He also purchased all the necessary items for this house & farm. He said that HYV's of crops

Seed Replacement in castor enhanced income

changed living standard of my

A 35 year old tribal farmer of Moongthala village (Abu Road Sh. Ram S/O Sh. Khetaji Garasia has 3.75 ha cultivated land . He hardly earned Rs.80000/- per annum from cereal crops and castor. He grew castor in 2.5 ha area and used local seeds or of private companies. Productivity of castor on his farm was 24 q/ha and most of the time crop was damaged due to wilt.

With the introduction of NAIP, GCH-5 and GCH-7 hybrid of castor were introduced in Pindwara and Abu Road clusters. Sh. Leela also replaced seed of castor with GCH-5 in 0.2 ha in the year 2008and achieved productivity of 45

Thereafter, he decided to adopt wilt resistant hybrid in castor. He is using hybrid in 2.5 ha and getting average productivity 45-48 q/ha and earning Rs.4.0lakh per annum from castor. He purchased tractor and thresher and also constructed new house.

Presently, cent per cent farmers adopted wilt resistant hybrid (GCH-5 and GCH-7) of casPindwara and Abu Road

Crop diversification ensured my livelihood - Bheru Lal Meghwal

An illiterate SC marginal farmer of village - Mandap (Mavli-I,) Sh. Bheru Lal Meghwal owns 0.5 ha land. From the agriculture he could harvest only 9-10 q of food grains which was insufficient to fulfill his family 's requirement and went to other village for labour work. His condition was miserable. One day he attended a off campus training and was motivated for cultivation of cotton for cash realization. In first he started Bt. Cotton cultivation in 1.5 bigha (50% of holding) and earned Rs.45000/- from cotton. Looking to the big amount of cotton he decided to grow vegetable during summer season. He cultivated vegetable (okra, coriander, onion and spinach) in 1.5 bigha and by sale of vegetable earned Rs. 30000-40000/- From enhanced income he constructed house, purchased one cow and one buffalo. Now he is happy farmer and said NAIP changed his life. After adoption of crop diversification his annual net income is more than Rs. 1.0 lakh.

HYV's brought smile to Phula Ram

A marginal tribal farmer of village Rajpura (Pinndwara) Mr. Phula Ram S/o Varda ii Meena owns 1.0 ha land. This is the only source of livelihood of Sh. Phula Ram.

Due to age old practice and continuous drought his income of Rs. 18000/- per annum form land could barely meet his expenses, so he migrated to nearby town Pindwara for labour. In rabi 2007, under NAIP Sh. Phula Ram was provided with wheat seed variety Raj. 3077 and gram variety RSG-888. He harvested 27 g wheat from 0.5 ha and 7 q gram from 0.25 ha. Looking the bumper vield in demonstration plots, he decided to practice agriculture with improved prac-

Thereafter, he adopted hybrid in maize and castor and HYV's in wheat and gram crops along with improved practices. Now he and his family member are happy. From increased income, he constructed pucca house, purchased buffalo, cow & 2 goats also.

Crackdown on the peasants of Rajasthan shows the Anti - people fascist face of BJP government: Left Front

Udaipur: The arrest of peasant leaders in Sikar and other parts of the state to suppress the movement demanding the waiver of all the loans given to the farmers is a fascist decision taken by the anti- people BJP government of Rajasthan. This was stated by all the leaders and workers of the left parties in Udaipur who demonstrated against the government's apathy towards the peasants at the gate of the collector 's office of Udaipur on

Addressing the demonstration the city secretary of CPI(M) Advocate Rajesh Singhvi said that the state government had agreed to waive loans up to Rs 50000 which would benefit 8 lakh farmers and to purchase groundnut, green gram and urad dal at minimum support price (MSP) at all district headquarters within 7 days, withdraw the hike in electricity rates for drip irrigation, pay the arrears of SC/ST/OBC scholarships immediately, relax the restrictions on the sale of cattle, take measures to protect crops from stray cattle and wild animals etc. The government had also agreed in principle to increase pension to Rs 2000 per month and write to the government of India seeking implementation of Swaminathan Commission recommendations on MSP.But all these promises have been simply hollow words after six months. Comrade Shanker Lal Choudhary, state committee member of CPI(ML) said that the budget pro-

visions proposed by the state government have laid down such conditions that none of the promises made earlier can be fulfilled. He said that farmers will not be afraid and shall continue their struggle. Comrade Birdi Lal Chhanwal said that the jails of the state government will be flooded by the peasants and the government shall not be able to contain the peasants .The secretary of Loktantrik Adhikar evam Sadbhavna Manch Prof. Hemendra Chandalia said that the people of Rajasthan will teach a lesson to BJP in the coming elections. The demonstration was addressed by Comrade Mohan al Khokawat, district secretary of CPI(M), Dr. Chandra Dev Ola, district secretary of CPI (ML), Saurabh Naruka of AICCTU and many other leaders of the left parties.

Sridevi, leaves India in shock

Sridevi passed away on Saturday night after a cardiac arrest, confirmed her brother-in-law Sanjay Kapoor. She was 54. The superstar of Bollywood was reportedly with her husband Boney Kapoor and daughter Khushi at the time of death. Bollywood actor Sridevi passed away on Saturday night after a cardiac arrest, confirmed her brother-in-law Sanjay Kapoor.. Sridevi was reportedly with her husband Boney Kapoor and daughter Khushi at the time of death. They were with the entire Kapoor family in UAE to attend the wedding ceremony of Mohit Marwah. Late Sridevi Kapoor's body will arrive in India tomorrow. Her last rites are expected to be performed on Monday. Born as Shree Amma Yanger Ayyapan, Sridevi worked in Tamil, Telugu, Malayalam and Kannada films before entering Hindi films.

She started acting in the late 1960s, but her performance in Malayalam film Poombata (1971) won her the state award for best child artist. Sridevi made her Bollywood debut as a child artist in Julie (1975). Her first adult role was at the age of 13 in Tamil film Moondru Mudichu (1976). Sridevi went on to become one of the biggest female stars India ever had. The government of India awarded her Padma Shri, the fourth highest civilian honour, in 2013. Her most remarkable films include Sadma, Chandni, Himmatwala, ChaalBaaz, Mr India, Nagina, Mawali, Tohfa and Gumrah among others. After working in Judaai, she took a 15year break from movies only to be back to winning hearts in her second innings with English Vinglish in 2012. She was last seen in 2017 film MOM.

Sridevi's most memorable onscreen pairing was with her real-life brother-in-law Anil Kapoor, while her most successful films were produced by husband Boney Kapoor.
