“GMCH: First Medical College & Hospital in Rajasthan to receive NABH Accreditation”

Udaipur: Geetanjali Medical College & Hospital today, announced that it has received accreditation from National Accreditation Board for Hospitals and Healthcare Providers (NABH), the highest national recognition and a mark of quality patient care and safety. This makes Geetanjali Medical College & Hospital, Udaipur the first to be accredited in the state of Rajasthan. With this recognition, it is the only medical college & super-specialty hospital with the highest national accreditation in the west zone.

The program was honored by the presence of Chief Guest, Director General Association of Health Care Providers of India (AHPI) Dr. Girdhar Gyani. The program also accompanied the presence of Chairman Geetanjali Group Mr. J P Agarwal, Vice-Chairman Geetanjali Group Mr. Kapil

body for this proud moment & said that the accreditation so achieved is a matter of pride and historical moment. The NABH Certificate was handed over to Mr. J P Agarwal, Mr. Kapil Agarwal, Mr. Ankit Agarwal, Dr. R K Nahar, Dr. F S Mehta & Dr. Kishor Pujari by

Chief Guest, Dr. Girdhar Gyani. Speaking on the occasion, Mr. J P Agarwal said, "We at Geetanjali Hospital are proud that our hospital has been accredited by NABH. We are constantly working towards providing the best of services to our patients,

enabling the benefits of the latest technological developments in the field of medicine. Patients are the highest beneficiaries of the accreditation as it assures high quality of patient care and safety. This achievement strengthens our commitment to fulfill the needs

of the community and provide patients care essential for their well being. This has been the aim since its inception to provide quality care & better treatment for patients" Dr. Girdhar Gyani, Director General NABH spoke on the benefits of accreditation to the

patients, society as well as the medical community. He mentioned, "It was a moment of pride for NABH also to be awarding the first accreditation to Rajasthan, which is the 19th state in the country to have an accredited hospital & medical college. Also from a list of 550

full NABH accredited hospitals, only 5 medical colleges have this recognition to which now GMCH, Udaipur has also its name registered under it. It is the continuous efforts of the Quality Council of India and NABH to ensure a quality of care the patients receive at a hospital. The objectives of accreditation are patient safety & promotion of evidence-based medicine. "AHPI Mementoes were presented to Mr. J P Agarwal, Mr. Kapil Agarwal & Mr. Ankit Agarwal and Dr. Kishor Pujari was announced the Vice-President of Rajasthan Sector by Dr. Gyani. Also, the mementoes of appreciation were presented to management team & doctors of various departments of GMCH. The program was anchored by GM HR Mr. Rajeev Pandya & Himali Vyas.

Heavy water extraction process may well prove to be a lifesaver

Chandi garh: The excess water released in the heavy water extraction process may well prove to be a lifesaver for thousands of patients diagnosed with breast cancer every year. Realising the health benefits of "deuterium depleted water" (DDW) and its potential to treat cancer, the Heavy Water Board (HWB) is looking for partners to sell it in India.

After years of dependence on foreign nations for the supply of heavy water — used as a coolant and neutron moderator in pressurised heavy-water reactors — India is now its biggest producer in the world, generating millions of tonnes of DDW in the process every year.

The DDW has shown encouraging results in breast cancer therapy and its regular use can have a curative effect on the body, said Dr U Kamchi Mudali, HWB Chairman and Chief Executive, at a recent event hosted by the Department of Atomic Energy in Kalpakkam, Tamil Nadu. The HWB has floated an expression of interest for companies to package it for sale in India.

Preliminary research by the Tata Memorial Hospital in collaboration with the HWB suggests that the DDW, if administered to breast cancer patients two weeks ahead of surgery or chemotherapy, can help speed up recovery and also cut down on chemotherapy dosage, he said. More research is required to substantiate its efficacy in treating other diseases, he added. The DDW is also being seen as an anti-ageing agent. Its regular consumption by healthy individuals reduces the amount of deuterium in body cells. This lowers the risk of DNA degradation, which effectively slows down the ageing process and prevents degenerative diseases such as cancer, said Dr Mudali.

Doctors at PGIMER, Chandigarh — the nodal centre for cancer treatment in the region — however, say no trials have yet been carried out at the institution on DDW's efficacy in treating breast cancer.

"No one has approached our department so far, but the PGIMER is open to conducting multi-institutional trials under controlled conditions," said Dr Rakesh Kapoor, Associate Professor, Department of Radiation Oncology, PGIMER, while emphasising that clearances from the Drugs Controller General of India and hospital's ethics committee are mandatory. The partner institutions have to fund the trials and provide requisite resources, he asserted.

While DDW's production is regulated in the country, a bottle sourced from international market may cost up to Rs 1,200. All this stands to change with the HWB opening up to DDW's sale for societal benefit under the "Make in India" initiative.

Deuterium and health risks

Non-radioactive in virgin form, deuterium is an isotope of hydrogen present in natural water. Its average concentration in water is 150 parts per million. Studies suggest high deuterium levels in body may cause DNA mutation and subsequent DNA damage.

How is DDW produced - Deuterium depleted water (DDW) is generated during extraction of deuterium from natural water to produce heavy water. DDW contains less than 120 ppm deuterium. Around 35,000 litres of DDW is generated while producing 1 litre of heavy water.

Shabdank ranked first in Udaipur

Udaipur: In the JEE Main entrance examination organized by the Central Board of Secondary Education, Shabdank Bhanavat, of Udaipur, got the first place in

the district. With 254 points and 1367 rank while Jishan Shaikh with 252 points ranked second in Udaipur with 1443th rank. Shabdank Bhanavat is a regular student in MDS who has prepared for IIT-JEE from Udaipur Center of Resonance while Jishan Sheikh Repeater and Nimish Nahar Resonance are non-integrated students.

Students studying in kota will get administrative support

Dr. Prabhat Kumar Singhal Kota: India is truly youth country 65 percent young-ones are putting full efforts in nation buildings. It is a matter of happiness that today in Kota, a large number of youth come

from various parts of the country for fulfilling their dreams. I am fortunate enough as the government has given the opportunity to help young people in Kota. Newly-joined district collector

Gaurav Goyal told in a meeting that he would provide coaching students homely atmosphere in hostels and paying guest places, a proper monitoring would be made so that they may get quality meals, proper guidance and get positive response from officials and coaching institutes, responsibilities will be imposed so that like previous years suicidal cases minimize to zero He said that for this, guidelines issued by the government will strictly be followed. Maintaining peace and law and order in the district will be their first priority.

Media-friendly Gaurav Goyal is rich with enthusiasm. He does not believe in growing flowers on paper. With practical and positive thinking, common people were given instant benefits in government services,

timely completion of projects, uninterrupted supply of electricity, water and everyone's participation in the development of the district with team spirit would be his line of action from day one Goyal said that the people's representatives in the democracy have a very important role. The biggest challenge is to identify the right and wrong person. Things can only be improved with the inclusion of people's representatives and politicians. He believes that bureaucracy and public representatives must work together. For betterment of common

Goyal believes that youth should get proportional guidance, get good education, get good jobs, get positive if it happens, no one can stop the country from becoming world power.

Positive Attitude and hard work are very important. There is no shortcut to success. Hard work has to be done. Spirituality is very important with positive thinking, pooja, meditation, yoga, or religious book are guiding Indian since long. To stay happy, one must learn about religion to balance the mind. Dr. Singhal presents a copy of a book "Adbhut Teerth" written by him. "Aardhy Tirth"

In the first meeting, Goyal also gave clear signals of his work system to the officials. All have to work together in coordination. The citizens should not come again and again with same problems at government offices. There will be a review of development works. Action will be on negligence at any level.

Gaurav Goyal is fond of playing games reading books,

running, listening to music specially of Kishore Kumar and Mohammad Rafi, playing tennis and table tennis. Loves to read religious books. Have a curiosity about learning about Vedas. He participated in the first half Marathon of Life in Pincity Marathon held in Jaipur on February 14, 2016 and ran for 21 kms in two hours and one minute.

In free times he loves to listen music & enjoys Lawn tennis and table tennis.

Goyal was born in Sikar, Medium of studies was English medium He took admission in Shriram College in Delhi for M. Com after completion of PG he appeared in IAS later joined Rajasthan goyal has been honored several times is his carrier as IAS He has been recently transferred from Jodhpur.

Congratulations to Annu Shree Shrivastava for Mars Mission

“CHAR COAT”---Strong script and natural acting impressed audience

Stunning presentation of play "CHAR COAT" staged by Anurag Kala Kendra, Bikaner at Darpan auditorium, Shilpgram (WZCC, Udaipur) during Rangshala on this first Sunday of May, 18 was a rare treat for the theatre lovers of Udaipur. Written by A.V. Kamal and directed by Sudesh Vyas this play received standing ovation. Play revealed the plight of a common man who goes to seek help

from the representatives of Four pillars of the Society i.e. Doctor, Police, Advocate, and Politician and gets bitter experiences. Not all, but many of the Doctors, Police Officials, Advocates and Politicians don't have ethics of their professions. They have made it a profitable business for themselves. They want to grab maximum money from people. This greed makes them to practice all unethical means of making money. They are neither bothered about their duties nor service. The scenario of all these important service professions was presented in true sense clubbed with sarcastic dialogues and very natural acting. The rich script described in-depth stories of each profession and narrated in very natural manner as if it is happening in front of your eyes. The role of common man by Ashok Vyas was portrayed with excellence and the audience was thoroughly engrossed with his character.

Naval Kishor as Vakeel was very illustrious. Kishan Ranga as Neta displayed all gestures of a crooked politician. Uttam Singh as Havildar was very natural. Suneel Joshi as Doctor and Kuku Singh stole the show. Usha Vyas as Lily was very impressive. All the actors handled their respective roles with full proficiency. With bare minimum properties and costume the team could create perfect atmosphere of Hospital, Police Station, Court and the Politicians rally. Director skillfully designed light and sound effects and dances to enhance the impact of the play. Bikaner has contributed a lot to enrich theatrical activities of Rajasthan. With small editing of few scenes, this play would become outstanding. Kudos to Anurag Kala Kendra for bringing such an enlightening drama to Udaipur.
