Business & Entertainment

Tuesday, January 1,2019

If you see nature around you, nothing is changing with the year. The morning, day, and evening all the way to the night remains the same. But if you see the faces, listen to the people, or sense the sentiments around you, you will find that the life's changing altogether. And that belief that the new year is here and the old year is going to be history is what is going to win

So, we easily can find out that it's there in the mind that drives us. And when the mind is ready to accept a fresh day a whole new start for life, let's buy that idea. And believe that life is changing from Tuesday, January 1, 2019.

When you believe, it happens. The first thing is about the resolution. And you must make one. And that one resolution is nothing but a pledge to listen to the heart. Your heart is one of the most ignored members of your own family. And then you suffer so does the heart.

So, when you listen to the heart, you get something done. And when you are done, you feel lighter and blissed. And when

vou do not listen to vour heart, you work hard to ignore that little voice emanating from your heart. And believe it or not, you work

double as hard when you go against that sentiment of your heart.

So, the one resolution you need is to learn to listen to your heart. It all begins when you start respecting yourself. Your own thoughts are as valuable as that of others. When you look at the celebrities or noted speakers, you need to take the best thought out of their ideas and add it to yours. But, if you pay some attention and brood over the matter, you actually take their idea and replace it with one of yours -now imagine how brutally you kill your own self.

Whatever idea or thought you might have, just nurture it and test it against your own life matters. With every test, you grow into confidence. And use that confidence to cultivate your idea of life.

Learning from others is a smart way but ignoring yourself in that process is simply stupid. And don't you do that!

That little voice that emanates from your own brain or heart is a true guide that helps you take the right decision every time. It is practically not possible to listen to that every single time but then there are ample instances when you can respect it. And these fewer instances make you what you are. These small instances make you a distinguished personality.

All these people who are now noted personalities and distinguished celebrities are exactly the people who resolved to listen to their heart. A singer who has ruled for a number of decades is the one who only listened to his heart when others discouraged him. His perception toward his own abilities was stronger because he kept adding the layers of those tiny voices from the heart and then made a name of his own so huge that even his critics became his fans.

That's it. Just follow your heart. Do what makes you happy. And you will surprise yourself!
