NDA'S TALLY TO GO DOWN BY 86 IF ELECTIONS WERE HELD TODAY...

AB KI BAAR KIS KI SARKAR?

New Delhi: NDA's tally to go down by 86 if elections were held today; UPA's to increase by 106: opinion poll. The poll findings have made even more probable the eventuality of a hung parliament, which may well affect the aspirations of Prime Minister Narendra Modi to be a two-term PM. The Bharatiya Janata Party (BJP)-led National Democratic Alliance (NDA) will face a major setback in Lok Sabha in terms

of its seats if general elections were to be held today, an opinion poll has found. As per the India Today-Karvy Insights Mood of the Nation Poll, the PM Narendra Modi-led alliance would witness a sharp drop of 86 seats compared to its 2014 tally, when it had managed to win 323 seats, with the BJP alone winning on an unprecedented 282 seats out of the total 543. The Congress-led United Progressive Alliance

would be a major beneficiary and would win on 166 seats. That would be an overall gain of 106 seats, if compared to the alliance's performance in 2014. The poll predicts that non-UPA, non-NDA parties would emerge as a powerful separate political force, winning a total of 140 seats. The list includes erstwhile Congress allies like the Samajwadi Party

and the Bahujan Samaj Party, which share an ideological resonance with Congress in taking on the BJP. The poll findings have made even more probable the eventuality of a hung parliament, which may well affect the aspirations of Prime Minister Narendra Modi to be a two-term PM. NDA allies and some within the BJP as well have been raising reservations about the functioning of the BJP under the

leadership of Modi and his trusted lieutenant, BJP chief Amit Shah. A strengthened third front may well press the BJP to opt for a more acceptable candidate than Modi. The poll predicts that NDA's vote share, despite the drop in its seat-share, would remain higher than that of UPA. While the NDA would get 35 per cent of total votes polled, the UPA would win 33 per cent vote share, as per the survey.

Building a Robust India

We are on the threshold of the 70th Republic Day of our country on 26th January. On this day in 1950 India adopted the constitution drafted by Dr. Babasaheb Ambedkar. Various events organized with great zeal by the Government of India in the capital showcases India's strength and power.

A grand military parade with participation from the Indian Army, Air Force and Navy beautifully exhibits our nation's military preparedness while traditional dances from different states symbolise unity in diversity. It is the day of display of India's might, democratic sovereignty and cultural harmony amidst different cultures, societies, religions and languages. India's demographic denotes that India has more than 50% of its population below the age of 25 and more than 65% below the age of 35. This is one of the greatest resources our country can boast of. It is expected that, in 2020, the average age of an Indian will be 29 years. In view of this huge & vibrant young population of our country, education is the tool that can empower them and instil capabilities that will drive our nation to rise above in every sphere.

"Education has power to transform lives." Therefore it needs to be on the top

most agenda of any country that seeks social transformation and sustainable development. India needs to strengthen its education systems to drive its efforts towards progress and sustainable development. On the importance of education, the UNESCO has aptly stated, "Education is one of the most powerful tools by which economically and socially marginalized children and adults can lift themselves out of poverty and participate fully in society." While we stress on the importance of education, it is imperative to note that our world is also changing rapidly, and in order to prepare our young generation for this ever evolving world, we need to change the way we educate them.

A prominent HR consultancy ManpowerGroup, had stated that the Specific Skill Set among our youth will be the driver as the future job opportunities will be higher in VFX Artist, Computer Vision Engineer, Wireless Network Specialist, Embedded System Programmer, Data Scientist, Data Architect, AI Research Scientist, Automobile Analytics Engineer, 3D Printing Technician, Vehicle Cyber-security Expert, Sustainability Integration Expert and so forth. Therefore, for India, the need of the hour is to focus on promoting 21st century education. Effective planning, policy formation and its implementation right from the grass root level will provide opportunity for our youth to be lifelong learners. Equitable quality education will only equip our young minds to be prepared for the future job market. 21st century jobs demand skills for work and skills for life in general. In order to inculcate skills among our youth, teachers are one of the most influential and powerful agents.

They can help students transform knowledge in order to apply it in real life situations. Teacher training and upgrading is vital to keep our teachers abreast of the global learning patterns. It is time for us to focus on the 21st century skills such as ability to collaborate, team work, critical thinking skills, communication skills, usage of technology and social responsibility. Dr. APJ Abdul Kalam would say that 'Robust India or Developed India' is not merely a vision but a mission that every Indian should undertake and succeed. This will certainly help establish the constitutional principles of justice, liberty, equality and fraternity in our country. Finally, as we commemorate our Republic Day, along with Dr. Ambedkar let us say with deep patriotism in our heart that we are Indians, firstly and lastly.

Wish you all a very Happy Republic Day!
