SHILPGRAM, THE CUSTODIAN OF CULTURE

Udaipur: (Prashant Shrivastava) The Shilpgram Utsav that ended on 31st of 2018 has left many memories etched on the minds of people who attended it. From Udaipur to India to the World, the spectators were only left mesmerized at the beauty of

Indian culture. People who read about the culture of India in books have no idea how big and grand the real picture would be. The Shilpgram, even apart from these ten days of celebration remains lively and eventful. The planner of the Shilpgram is always full of

activities that include poetry, art, literature, music, food, crafts, and lot more. The West Zone Cultural Center that takes care of it ensures that the fragrance of pious Indian culture and soil keeps emanating from here and keep wafting in the atmosphere.

One Shilpgram signifies and sums up the entire cultural spectrum of western India. And since it is in Udaipur, the local magic is well spelled. The success of Shilpgram is a really inspiring story for all the regions of the country. Every city in the country should have a Shilpgram where the local culture can breathe and nourish amid the smoke and dust of modernization where everything is slowly turning artificial. One such center in every city can ensure that the art of the place lives and lives long. The expansion of modernity is called development which also causes the contraction of artists and their talent. While the computerized orchestra drives every cultural program in the cities, you need a platform made of raw soil where instruments like flute, Tabla, Sitar, Mridangam,

Tanpura, Pakhavaj, Ektara, and so on could be heard. A place where poets recite the authentic poetry and ghazals. This idea is not only a refreshing one, but it can also become a major tourist attraction. Plus, you are conserving art for the future. As of now, the pace with which we see the downfall of traditional heritage, the future generations will only read about, and then soon no one will know about these instruments, for example. And if you doubt whether artists will like it or people would come to see the real theatre instead of cinema or food served on cots instead of fine-dining, you must understand the example of Shilpgram Udaipur. The place is a huge success. It is not only one of the best places to see in Udaipur, but it also is the custodian of culture.

"15 months old survived a successful Open Heart Surgery"

Rajasthan State's First Successful Operation

Udaipur: Geetanjali Medical College & Hospital a Super-Specialty Tertiary Care's Cardiac Centre showcased a successful case of Rajasthan's first of kind "Intra Cardiac Repair of Fallot with RVOT Stenting" on 15 months old & weighing only 5 kilograms boy. The team of successful surgery involves Cardiac Thoracic Vascular Surgeon Dr. Sanjay Gandhi along with Cardiac Anesthetist Dr. Ankur Gandhi, Dr. Manmohan Jindal, Dr. Kalpesh Mistry, Dr. Ashish Patiwal, Cardiologist Dr. Kapil Bhargava, Dr. Ramesh Patel, Dr. Danny Kumar, Dr. Shalabh Agarwal, OT & ICU Staff who co-ordinate well in the complete corrective surgery as well as RVOT Stenting.

Born as a third child to an Udaipur resident, Deepak Khateek was suffering from blue-tinged skin & cyanotic spells since birth. He soon started losing his conscious state after crying lot. He was admitted in Geetanjali Hospital in emergency to where on investigations of Echo-Cardiography & Cath Angiography, it was confirmed as congenital heart disease named Tetralogy of Fallot. It is a rare condition caused by a combination of four heart defects that are present at birth (congenital). These defects, which affect the structure of the heart, cause oxygen-poor blood to flow out of the heart and to the rest of the body. Infants and children with tetralogy of Fallot usually have blue-tinged skin because their blood doesn't carry enough oxygen. The treatment prescribed for the same is surgery but as the baby was too small and underweight it was decided to opt for a solution in reference to which RVOT Stenting was done to make the baby survive for surgery. Cardiologist Dr. Ramesh Patel identified this child with an abnormal function of heart and adopted RVOT Stenting, stenting of the right

ventricular outflow tract (RVOT) in the initial palliation of symptomatic patients with severely limited pulmonary blood flow.

"This is a case first time happening in Rajasthan since there is a history of only 100 RVOT Stents on record in medical journals world over of such operations," said Dr. Ramesh Patel.

The boy soon started gaining weight & was out of danger. But this was not a complete treatment. He was then referred to Cardiac Surgery team where a successful Intra Cardiac Repair Surgery was performed. The surgery lasted 5 to 6 hours.

"The stent implanted by the cardiologists was to be removed prior to closure of hole in heart and obstruction in right ventricular flow. As the stent was of metal, so when the body grows the stent doesn't. So firstly & most importantly the stent was removed very cautiously as it may lead to anytime heart failure. Then the hole was closed with white medical patched & the obstruction was opened. This contributed to a complete corrective surgery commonly known as Intra Cardiac Repair Surgery. The young boy was kept on heart-lung machine & all the small instruments required in a neonate surgery were all available at Geetanjali Cardiac Centre," said the treating cardiac surgeon, Dr. Sanjay Gandhi.

"Such patients require immediate medical intervention as they are at very high risk. This disease has a ratio of every 1 out of every two thousand patients. A boy 15 months old usually weigh around 10-12 kilograms but this boy was weighing only 5 grams which was a big challenge for the team to operate & make the boy survive. He will now lead a normal life but will be kept on a regular follow up for betterment," Dr. Gandhi.

In the press conference organized by Geetanjali Medical College & Hospital, the Executive Director of Geetanjali Group, Mr. Ankit Agarwal, congratulated the whole team on a successful surgery performed and establishing a new milestone in medical history of Rajasthan. He also further added to include new educational & technical courses to overcome the upcoming future challenges in medical history. He also said that there will be coming many new & many more articles to be shared giving Geetanjali a PAN India recognition. This success is also dedicated to a well coordinated management & staff at GMCH making the things happen successfully.

Geetanjali Medical College & Hospital's CEO Mr. Prateem Tamboli said that "The only interest we understand at Geetanjali Hospital is of Patient Interest. We are committed to provide a quality health care to all our patients and are creating innovations. We have also moved from Tertiary Level Care to Quaternary Level Care, a step ahead, to be the trend setter not only in Udaipur, but to all our surrounding territories. Success & innovation comes when a team equally works for a common objective as in this case where in this case also the common objective made the child lived.

Health messenger accompanied by a message of 'fungal par Dangal'

Udaipur: Awareness rally on 'fungal par Dangal' under the auspices of Indian Association of Dermatologist Venereologist and Leprologist (IADVL) left for Jaisalmer from Udaipur at 7 a.m. on Sunday. The rally was flagged off by Dr. Anand Gupta, Secretary, Indian Medical Association (IMA). The cycle rally, from Udaipur, reached Rajsamand on Sunday evening in the first stop.

Dr. Prashant Agarwal, the local convener of the program, said that the team of 20 women and men cyclists from Pune is also participating in this rally, which includes many well-known doctors and professionals from the age group of 30 to 80 years. In support of this health awareness campaign, along with Dr. Prashant Agarwal, along with around 30 members from Udaipur Cycling Club, from Udaipur, walked along the way for about 45 km. By distributing the template during the rally, the common man was made aware of the protection from fungal infection.

Relying upon Udaipur, Rally Nathdwara, Rajsamand, Pali, Jodhpur, Pokan will reach Jaisalmer on January 11. On this occasion, Dr. Anand Gupta said that cycling is a very important contribution to health awareness. A cycle is the full exercise of the body. He congratulated Dr. Prashant Agarwal for this first unique event of his kind for awareness of skin diseases.

Dr. Narinder Patwardhan of Pune Convenor Pune said that considering the long road, two vehicles will also run along with the team of cyclists so that any kind of medical or emergency help can be provided immediately. Just a day before a press meet was organized by Dr. Prashant Agarwal.

-- Dr. Narinder Patwardhan, organizer of the program, from Pune said that he has been running awareness cycles campaign for various subjects for 21 years. This time, he has selected awareness of diseases caused by skin diseases and has kept the theme "a Dangal on the fungus" because there is a lack of awareness among people. Nanduji, president of Pune

Cycling Sansthan, told that once Poona was called a city of bicycles, but due to a partial life, now the situation of noise, pollution and traffic jam has become a reality. We had seen the awareness of bicycle awareness in people 21 years ago, now that movement has become.

He chanted the mantra "Heated the feet by cycling, the stomach was soft, sent cold, the disease was beaten". Nitesh Tank, president of Udaipur Cycling Group said that cycling is growing in the city and there is nothing to be cautious about cycling if it is to get good health.

Dr. Prashant Agarwal said that people of our country are not aware of the fungal infection. In ordinary language, herpes and itchy are very light, whereas their timely and precise treatment is necessary. Many times if they refrain from showing the doctor, they sometimes use a tube with affordable steroids. This increases the resistance of fungus to expand. With the new immune system, the drug stops working on the fungus. It was considered a simple disease a few years ago, but now it has increased so much across the country that the patients sometimes come to the skin specialist in a very dysfunctional condition and it takes more time for them to have the effect of medicines. Many times it takes months.

During the cycle rally, awareness pamphlets will be distributed, as well as the public will also be told how they can avoid themselves by doing some rescue measures. Avoid moisture from places like, do not wear wet clothes, take special care of bathing every day and body hygiene, do not use others' towels and handkerchief etc. Do not use cheaper creams of steroids available in the market, medicines, and herbs. He said that the name of this rally was called 'Dangal on the fungal' because we have all fought together with a fugitive and have to defeat it. Public participation in this is very important.

Interview: Jugal Rathi: Age 71, looks young

CA Jugal Rathi from Pune told that the cycle is for both selfish and paramour. Keep yourself healthy, keep others healthy too. If you do cycling then half of the city gets resolved. Traffic improves, life goes on track too. While sharing a special incident, Rathi said that there is a jogging track of 450 meters in Deccan Gymkhana Club in Pune. On their sixties birthday they thought that something new should be done, then they made around 60 rounds on this trek. After this, this annual event took place, which also has a large number of people's participation. On his birthday on 5th June Environment Day, he celebrated his 71st birthday by trekking 71 on his birthday. He completed this distance in 4 hours and 20 minutes. Along with them, 200 people of the city also circled their capacity. Thus, there were a total of 2800 rounds. Jugal Rathi points out that cycling came to mind in 2002 after seeing a cycle rally in 2002. By 2005 it became a passion. He gave up his scooter and car. Now they also use bicycles in everyday activities. If there is more distance then public transport can They say their message is simple, get a bicycle, get rid of many problems of life.

Workshop on Organic Farming by SMRIM

Udaipur: Society for Microvita Research and Integrated Medicine (SMRIM), Udaipur organized a one day workshop on Organic Farming at Saleda, Near Bhinder on Sunday, 6th January, 2019. Organizer and Society Secretary Dr. Vartika Jain told that workshop was inaugurated by garlanding the picture of Shri P.R. Sarkar, founder of Microvita theory and concept of Ideal Farming by the guests from Germany, Mrs. Sarita and Mr. Frank Barbar. Society member Lalit Prajapat welcomed all the guests by garlands and introduced them that Barbar couple is doing organic farming at Germany since last 20 years and from last one month doing awareness campaign at various places of India among the farmers.

Keynote speaker Mrs. Sarita told the farmers at Saleda, that Organic Farming is the solution of many problems of today's world as it is chemical free. She gave the example of Punjab and told the agriculture rich state is in bad situation today due to use of chemical fertilizers and lots of people are suffering there from deadly cancer disease. She stated that chemical free food is good for developing a sentient mind and environment and overall good for higher spiritual development. She showed the pictures of vegetables and crops grown in organic manner at Germany and motivated farmers to adopt the technology.

Shri Frank told that soil loses its natural fertility due to chemicals and does not give good yields. Due to heavy loss of crops, farmers are doing suicide. He told that farmers have to make co-operative societies to get proper results of their hard labor. Couple also gave answers to various queries raised by farmers.

Secretary Dr. Vartika told that industries of chemical fertilizers are getting huge subsidy but there is very less interest in development of Biofertilizers and Bioinsecticides. Awareness should be made at large scale to avoid food with chemicals then only deadly diseases like cancer, diabetes, hypertension etc. will be reduced.

In the end, Society felicitated the guests with their official Bulletin on Microvita Research and Integrated Medicine and I.S. Rathore gave thanks to guests and all the participants. More than 30 farmers from Bhinder, Kanore, Khetakhara, Kunthwas and Rajsamand participated in the workshop.

Urma Married at the tender age of 10 months, now got freedom

Jodhpur: After suffering for 18 long years subsequent to a child marriage at a tender age of just 10 months, 19 year old Urma Bishnoi has now got her freedom by child marriage annulment. Urma Bishnoi who is from Jambanagar of Kaparda village of Jodhpur was locked in child marriage in 1999 when she was just 10 months to the boy of Kaparda village itself. The boy was allegedly involved in criminal activities. So the family was in terror every moment.

Threats to family- After Urma became adult she refused to accept the child marriage. Her in-laws have started pressurizing her and her family. They had threatened with dire consequences like cutting their nose- ears and damaging them. Certain caste panchs also threatened the family of penalty and social boycott if the child marriage was annulled. Urma and her family members were quite frightened.
