

Problem of a submerged area of Roopasagar Talab is due to administration : Dr. Munesh Arora

Gradual hunger strike from Thursday to resolve the problem of submergence of Roopasagar Talab.

Udaipur: The administration of Udaipur is forcing the people living around Roopasagar Talab to live a hellish life. For more than the last 12 years by pretending to be the cause of the so-called submerged area of Roopasagar Talab. The problem of Roopasagar Talab is a product of administration itself.

In the master plan, it was necessary to construct an 80 feet road which is important for the city, but instead of taking the road on the banks of Roopasagar Talab, the then officials

of UIT planned intentionally 80 feet road from the middle of Roopasagar Talab. That is not feasible for which opposition start, the administration is taking Arihant Nagar Nakoda Nagar Sagar Complex, and Punjabi Bagh by bereft of common facilities available to them. There is no record of Roopasagar Talab since 1947 with the Department of Water Resources. Because Roopasagar Talab comes under the category of a puddle, which was used by the villagers due to the drinking of animals and being in private accounts.

-The Department of Water Resources has never looked after this puddle nor has it done proper management of the water coming in it to date. They don't have official Record of Roopasagar. Because its not come in the category of Talab. -

Therefore, if seen, the sail of Roopasagar Talab was also very raw 12 years ago and its

thickness was also very low, so that the people living in the down stream, when filled to its full capacity, would run the risk of drowning if broken. <

Today this sail has been thickened by adding filler, but even today its texture is not proper according to engineering point of view in the category of any tank. Each tank has a proper way of the inward and outward flow of water. Even today, the water which is coming in the Roopasagar Talab from the top, most of the water which passes through the university, passes through the temple of Bohra Ganesh Ji and passes through the Ganesh Jain hostel and passes through the town of Ostwal Nagar also from near Pesticides India.

It was found in the river because there has been an over flow on the route of that water, so that water is diverting today and coming to Roopasagar. But due to lack

of proper arrangement for evacuation, this backwater gets washed away in the pitched houses and plots given by the city development, in which the administration is giv-

ing the name of the submergence area of Roopasagar. If the submergence area started to be determined in this way, then the entire Patna metropolis should be washed away

due to the condition of Patna recently. But the administration of Udaipur deliberately does not want to solve the problem of Roopasagar. Mokhi of Roopasagar Talab was encroached by notorious people FIR was lodge but no one arrested. Its happened so many times but district administration was fail to handle the situation.

UIT Udaipur published a notification on 27.7.2007 vide number 302 based on general information, in which Khasra number was published for the first time for the marking of Roopasagar Talab under DB Civil Writ Petition 28, 2005 Jodhpur. Why that was disturb by the UIT Udaipur. In fact there was no problem in the name of the submergence area and after being satisfied with the full investigation,

people spent their life time earning in buying plots and built houses here, but today they are named after the sub-

mergence area. It is being planned to destroy the colonies living in the vicinity of Roopasagar Talab have been demanding for the last 12 years to get rid of the misbehaviour and torture happening to them in the name of drowning area from Udaipur administration. In this regard, even the then Government Secretaries, GS Sandhu and Ashok Jain, the people here, made their point during the public hearing.

When he faced this problem in front of GS Sandhu, he was so distressed that he also boycotted a banquet organized in his honor by the officials of the UIT. He left his room angry.

Despite all this, to date, the UIT Udaipur and district administration have not been able to give any relief to the citizens of this place. Recently, people living in Arihant Nagar, Nakoda Nagar, Sagar Complex, Punjabi Bagh gave

one-day symbolic dharna outside the District Collector Office. Women living in this area told District Collector Anandii the problem of this area, but they are being assured repeatedly by the administration. In order to get rid of the problem of the drowning of Roopasagar and to develop the area of the area, on Sunday, a meeting of the citizens was organized in which it was decided that on Thursday 12th onwards a peaceful hunger strike to be staged before district administration and demand will be sought from the administration, for resolving this problem, according to the situation of 2007, this area should be developed by developing a pool. At the meeting held Rakesh Paliwal along with Ashok Sharma, Arjunlal Sharma, Chandrash Arora, and Sanjeev Talwar, gave their views. A large number of local women and men participated in this meeting.

21st Foundation Day of MPUAT celebrated

Udaipur: The 21st Foundation Day of Maharana Pratap University of Agriculture and Technology, Udaipur was celebrated with enthusiasm.

A program organized in the CTAEAVP Hall, the Vice-Chancellor of the University Prof. Narendra Singh Rathore graced the ceremony while V.B. Singh, Prof. PK Dashora, Prof. Umashankar Sharma and all the ex-officio, directors and all higher officials of MPUAT, faculty, non-academic staff, farmer siblings and stu-

dents were present at this auspicious occasion.

Vice-Chancellor of the University Dr. Narendra Singh Rathore Welcoming everyone, said in his address that it is a matter of joy that today we are all going to celebrate the 21st Foundation Day of Maharana Pratap University of Agriculture and Technology. He said that today there are many challenges before the university which we have to cope up. He said that the university was established in

November 1999 after a lot of struggle and public agitation. Initially, in 1962, Udaipur Agricultural University was the second agricultural university in the country, but later in the year, MPUAT came into existence after becoming a multi-disciplinary and Sukhadia and Rajasthan Agricultural University.

The ICAR ranking of the university approved by the state government with the financial support of 1 crore was very good in the beginning.

But due to the shortage of staff and faculty and the continued division of the university enclosure, our university's ranking is at number 51 today, we need to improve it.

In which all efforts will be made to improve it by taking the guidance and cooperation of all the invited former vice-chancellors, founders, directors, employees. He said that today only 22 percent of teaching staff and 33 percent non-teaching staff are available in the university, and every effort will be made to fill them.

On this occasion, the former Vice-Chancellor of the University, Dr. VB Singh, Dr. PK Dashora, Dr. Umashankar Sharma and all the former founders, directors and other officials of the university also expressed their resolve to enrich the university in every respect.

At the beginning of the program, the Vice-Chancellor welcomed all the former Vice-Chancellors, Founders, Directors of the University.

On this auspicious day, the Director of Research, Dr. Abhay Kumar Mehta presented the complete details of the development work and research achievements from the year 1999 till date. Dr. SI Mundara, Director Prasar Shiksha, also presented a detailed outline of the various actions the farmers have done so far by the university.

He elaborated on various projects, agricultural training, seminars, seed distribution, providing agricultural implements to farmers, etc., on various projects going on at the eight Krishi Vigyan Kendras of the university.

Break the silence - Be Sani campaign

Udaipur: A unique initiative of District Collector Smt. Anandi, break the silence for health awareness and hygiene in the girls of the district, an awareness program was held at Rumavi Rawalia Khurd. Principal Rajesh Vyas said that in this program, the team of Darshan Vyas from the district headquarters gave an awareness message to the students by showing them a film about precautions taken during menstruation, management of hygiene, etc. On this occasion, Dr. Rohit and Dr. Payal also gave necessary information.

Dr. Suhail of the Medical Department and Lab Technician Surendra Singh conducted blood tests of all the girls. Local female parents, ANM, Anganwadi workers, Asha Sahyogini, and other staff members were present on the occasion.

Being human reached inaccessible villages

Udaipur: Under the initiative of M Square Foundation, Being Manav, facilities are now being provided to inaccessible villages in Udaipur district. Under this, stationery and clothes were distributed at the Government Higher Secondary School at Khajuri village of Girwa Panchayat Samiti along with fellow Huma and Supriya of Piramal Foundation on Wednesday.

Mukesh Madhwani, president of the M Square Foundation, said that children from the first to the fifth were distributed two notebooks, pencils and clothes collected under Being Human, as well as registers, were distributed to children from the sixth to the eighth. Children's faces blossomed after getting stationery and clothes. It is noteworthy that under Being Manav, cloth drawing is being done on the 23rd of every month including various other days. Huma and Supriya's cooperation with Piramal Foundation was also commendable in this drive on Wednesday.

Madhwani said that under this, sweaters, shoes will also be arranged for children in the coming days so that

children can get relief from winter. School staff and a team of Being Manav were present on the occasion.

Nutritious food divided among malnourished people

Udaipur: The campaign 'With malnutrition to fight with nutritious food', a team of 70 service people reached the remote tribal malnourished areas with multi-vitaminized nutritious food. NSS Director and Camp General Manager Smt. Vandana Aggarwal informed us that at 8 am, all the teams reached the 19 campsites and started giving nutritious food. Under the joint aegis of District Administration and Narayan Seva Sansthan, the District Collector Smt. Anandi started the campaign to eradicate malnutrition with special preparations. Under which 59 on Sunday in Bakeria (Kotda), 31 in Dhedmaria (Kotda), Badli (Kotra) 37, 28 in Mahadi (Kotra), 18 in Vagavat (Kotra), 49 in Khajuria (Kotra), Vishma (Saira) 27, 28 in Dhoori (Saira), 41 in Ambiwada (Falasia), 14 in Bichiwarra (Falasia), 29 in Ambasa (Falasia), 21 in Panarwa (Falasia), 19 in Nevaj (Falasia), 27 in Jhadol, Mag was (Jhadol) In 14, 22 in Thobawada (Jhadol), 22 in Chandwas (Jhadol), and 18 in Goran (Jhadol), were distributed food kit for. Rust with malnutrition with nutritious The benefited people were happy to get help. Giving detailed information about this campaign, the president of the institute Prashant Aggarwal said that on the second day, nutritious food reached about 500 identified malnourished people. The Seva Dal of the institute will continue to serve malnourished people of these areas for three months under the cooperation of

the district administration and under the guidance of the District Collector. Nutritious kit contains multivitamin flour, rice, peeled peanuts, oil, sugar, iodized salt etc. Which will play an important role in eradicating malnutrition? Only a healthy society can illuminate the country.

Stationery Distributed among Kids

Udaipur: RTI Week running under the joint aegis of Round Table India and Ladies Circle India has distributed stationery to children in the adopted Pahada school.

Tabler said that on this occasion, Tabler Hussain Mustafa gave the children abstract information on the subject of Employee India. Members of both clubs inspected the cleanliness of the toilet blocks previously built in the school. Many members were present on this occasion.

Positive thinking is important in life - Prof. Sarangadevot

Sono chemistry book released

Udaipur: The Vice Chancellor, SS Sarangadevot of JRNu presiding over the International Year of the Periodic Table of Chemical Elements, on Monday, on behalf of the Faculty of Science told the students about the importance of the periodic table and how all the elements found in nature has been classified on the basis of different qualities. He paid tribute to Medeli F which is the father of the periodic table and said his contribution will be remembered till universal is in existence.

Prof. Sarangadevot said that the periodic table is seen as a very important and influential achievement in modern science, which has importance not only in chemistry but also in physics, biological science and other subjects related to science. He said that it is very important for students to have positive thinking as this is the first step in build-

ing their personality. On this strength, they can move forward in life. Convenor Dr. Rakshit Ameta said that questions were also answered by students. Distinguished Guest Prof. Suman Pamecha, Deputy Registrar Riaz Hussain also expressed views. Dr. Rakshit Ameta, a recently published book Sonochemistry from the international publisher Apple Academy Press America, was released by the guest. This book is based on an important research area of green chemistry in which many chemical reactions are described through percolation. The operation was conducted by Dr. Deepti Sani.
