

## Geetanjali hospital treated critical cardiac patient during havoc of corona pandemic

**Udaipur:** As we are aware of grim situation affecting worldwide due to corona pandemic causing a havoc to many patients suffering from other health problems.

Facing high risk of infection and other hurdles doctors of Geetanjali hospital are committed to provide healthcare efficiently. As it was seen in a critical case of 50 years old Mohanlal Gurjar from Rajsamand, who undergone through the bypass surgery was conducted efficiently by team of cardiac doctors. The cardiac team that performed the highly complex treatment included cardiac surgeon Dr. Sanjay Gandhi, Dr. Ajay Verma, Dr. Partha Vaghela,

cardiologist Dr. Kapil Bhargava, Dr. Ramesh Patel, Dr. Danny Mangalani, Dr. Shalabh Agarwal, Dr. Shubham Chelavat, First Year Resident Dr. Sandeep, Dr. Anil Sharma (Rajsamand Hospital), Dr. Nehru (Rajsamand Hospital) and Dr. Ankur Gandhi, Dr. Kalpesh Mishra from Dr. Gitanjali Anesthesia Department, Dr. Chintan Patel, Dr. Archana, Cath Lab, C.C.U , CTVS OT, CTVS ICU team etc. contributed well so that the operation was successfully carried out.

### - Facts -

As patient reported, he felt uneasiness a few days ago resulting unconsciousness and was taken to hospital of

Rajsamand, where Dr. Anil Sharma and Dr. Nehru restored heart beats through CPR technique, which was remarkably effective to save his life. Soon after, the local doctors left for Geetanjali Hospital with an ambulance immediately.

Dr Sanjay Gandhi reported that while transferring him to udaipur, his heart stopped functioning, so as he reached to emergency, DM resident Dr. Sandeep tried to restore heartbeats through CPR technique, and after observing improvement, patient was taken to ICU where a temporary pacemaker implanted and was kept on ventilator.

Dr Gandhi said when patient was taken to Geetanjali

hospital he was suffering from fever, hence a covid-19 test was done for the safety measure. His heartbeat was only 30 per minute and kidney, liver were deteriorating. After angiography, 3 blocks were

found in coronary arteries out of 2 were 100% blocked, and his condition was so fragile.

So instead of sending him back to home bypass surgery was the only possible action which could save his life.

Though it was very risky seeing patient condition. His family was briefed of the situation and decided to go for surgery which took place while giving artificial palpitations through balloon pump then patient was kept on ventilation in ICU for 5 days. After observation of his condition Balloon pump and ventilator both were removed and patient was discharged while he was able to walk by his own without any support.

To keep in notice that Geetanjali Hospital follows guidelines of ICMR and MOHFW (Ministry of health and welfare of India) and all protocols are being followed while treating patients of different indications.
