ACCOUNTING EDUCATION IN VIRTUAL ENVIRONMENT

Today, the world is gripped by COVID-19 pandemic which has created uncommon chaos across the globe. In view of the present circumstances and the expected future ambit of the Covid-19 pandemic, one of the biggest challenges facing us is about how institutions, academics and practitioners can adapt and sustain themselves in the present situation. This pandemic has transformed the centuries old chalk-talk teaching model to one driven by e-learning model. This change in the delivery of education is impelling academicians and practitioners to figure out how to drive engagement at scale while ensuring inclusive e-learning solutions and tackling the digital divide.

It is thereby considered to reevaluate the current delivery and pedagogical teaching methods in higher education by seamlessly integrating

classroom learning with e-learning modes to build a linked learning system.

The pandemic has significantly disrupted the higher education sector as well, which will critically influence country's academic future.

REFORMATION IN ACCOUNTING EDUCATION WHAT WILL CHANGE:

In the post COVID-19 era, accounting principles i.e. accounting concepts and accounting conventions will not change. Even the accounting rules, theories will stay intact along with the accounting standards and auditing standards but are subject to amendments as per the guidelines of FASB as and when required. Above all, the human curiosity will not change with regard to accounting education.

WHAT WILL NOT CHANGE:

But, what will change in the

post COVID-19 era is the method of imparting education in accounting as the mode of delivery will relocate from classroom to web and mode of interaction will stretch from one on one in classroom to internet savvy students. New Classrooms will be your residence or it may be the natural environment (park, forest, mountain etc.) around you. The need of high internet connection will be desirable along with IT solutions to handle mul-

multiple participants. National boundaries will disappear for teachers and students as seminars have transformed into webinars. The need for advanced excel software will be the need of an hour.

Change in cost structure: Cost of education and training will ultimately go down as their will be reduction in number of classrooms, teachers, buildings, textbooks, transportation etc. but this will be compensated by the need of IT investment for academics and professional institutions, higher cost will also be involved in terms of time for academics and practitioners to learn to participate in delivering lectures through the internet.

Change in work ethics and reward system will be seen as reward will be based purely on output rather than attendance so trust need to be developed in work ethics.

Record keeping will become fully digital which will give birth to audit frauds as well. Lectures, notes, research environment and slides will also become fully digital. Physical library will transform into digital library. Digital access to journals through internet will enhance online publications as well.

CHALLENGES IN FIELD OF ACCOUNTING EDUCATION BY ITS USER:

With regard to this revolution there will be challenges to be faced in accounting education by the users which are enlisted below:

- The lecturer
- Cognitive load
- Need to know backgrounds and challenges of students
- Less formal and professional
- Less lecturer required
- Present from anywhere

in the world leading to competition

- Students
- Detachment and many distractions
- Loose intimacy, reaction and engagement
- Opportunity for international students
- Environment
- Managing technology and lost time
- Expectation for perfection gone
- Digital capabilities are not distributed equally across universities, and deficiencies have delayed implementing systems for online teaching.

is really relevant and important

- Content
- Forced to focus on what
- Upload online notes, videos, publications.
- Assessment
- IT use new innovative technologies like advance excel etc.
- To manage online edu-

cation applications.

HOW TO COPE WITH THESE CHALLENGES AS ACADEMICS AND PRACTITIONERS?

A teacher is always a learner first, so he have to face these challenges and convert them into opportunities which is the need of an hour.

• Be prepared to learn IT aspects of teaching

• Delivering effective lectures remotely

• Engaging students through asking/answering questions from them

• Making learning-process fun

• Involve hands-on experience on projects

• Use internet technology and databases to assign realistic homework problems

• Learn how to grade digitally turned in assignments

• Practitioners

• Digital record keeping became more popular.

Monitoring, reviewing, assessing and advising the staff remotely.

Audit evidence will become fully digital.

So, we conclude that with challenges comes opportunities and COVID-19 has taught us to manage social interaction whether it has to do with education or work place virtually. It has enhanced the overall efficiency in work as people worked ethically. It provided better and relaxed work environment of your choice and also proved to be techno-savvy and environment friendly by gifting us with:

- Less movement, less driving, less air pollution which means clean air.
- Due to work stoppage, less industrial wastes into the river hence clean rivers.
- Less paper work, that means less paper waste and saving of trees.

- Dr. Nuzhat Sadriwala

Twenty Eight Years of a Committed Struggle

On 28th June, 2020 a webinar was organized to commemorate the 29th foundation day of Mahaveer Samta Sandesh, a fortnightly published from Udaipur which is owned by socialist activist and journalist Himmat Seth and published regularly since 1992. It may appear a small thing to people but those who have read Mahaveer Samta Sandesh and participated in programmes organized by it, would certainly vouchsafe that it has been a journey committed to the ideals of socialism and democracy.

The webinar began at 11.15 am and continued till 2.00 pm which itself shows that people were eager to participate and express their opinion about the paper and the topic "Janpakshadhartha Aur Media". The purpose of this webinar was to link people across the country to discuss the condition of media in the present situation of the country. Among those who participated in the webinar were professors, journalists, political activists, writers, poets and social workers. In the beginning the Chief editor of the paper Himmat Seth welcomed the guests and said that every year this day is celebrated in the form of a good gathering of people but due to the pandemic it is not possible this year so we are meeting of a digital platform. The discussion began with Prof. Anand Kumar, former professor at Jawahar Lal Nehru University, New Delhi. He said that the biggest change that has taken place in recent past is that media has started speaking the language of state and has started justifying their lies. This is true of electronic as well as the mainstream print media. It is becoming difficult to be true to the aspirations of people in these times. Dr. Ramsharan Joshi, former Vice President of Kendriya Hindi Sansthan and a noted journalist expressed the need to harness the national media and for this he recommended the formation of a Media Commission. He applauded the efforts of Himmat Seth and his team for keeping the true spirit of journalism alive in Udaipur. Dr. Sunilam, ex-MLA and convener of Samajvadi Sangam, said that despite all challenges such small newspaper must survive. He said that their presence is essential to keep the democracy intact. Ramkishore, a socialist thinker and writer from Lucknow joined and gave his opinion about the present day journalism. He said that the threat to independent journalism is much more today. Many of the intellectuals are in jail today. Those who express freely and criticize the government are victims of the state. Member Press Council of India, and President, Press Association of Delhi Jai Shankar Gupta spoke on the lies prevailing the state, politics and the journalism in present India. He said that the majority of press keeps toeing the line of the state narrative and there are just a few who ask questions from the government. Advocate Aradhana Bhargava, Bhopal addressed the webinar and spoke of the work being done by Mahaveer Samta Sandesh. She said that such a journalism is like Tapasya. Well known story writer Dr. Gopal Sahar joined from Kapadvanj, Gujarat and told about the suffocation writers and journalists were suffering in Gujarat. He said that Mahaveer Samta Sandesh is playing a crucial role in voicing the protest in such difficult times. Prof. R.N. Vyas, former Dean, College of Arts, M.L.S. University said that the fourth pillar of democracy has become a tool in the hands of executive which is appropriating not only the legislature but judiciary also to fulfill its political agenda. Shankar Lal Chaudhary, state committee member of CPIML said that the media is owned by the corporate and serves the interest of the corporate and their allies in the government. He said that the present ruling parties are serving the corporate and are not bothered about the people who voted them to power. He said that small and alternative media can only protect people's interests in the country. Dr. Suresh Khairnar, former president of Rashtra Seva Dal said that the mainstream media is completely devoid of any responsibility and is churning lies every day. It is working overtime to spread the propaganda of the BJP and RSS. He admired the work done by Mahaveer Samta Sandesh over these years and expressed his good wishes for the years to come. The webinar was convened by Prof. Hemendra Chandalia. Hemant Paliwal took care of technical arrangements for the links and connectivity.

DB Gupta becomes Advisor to CM Ashok Gehlot, Chetna Ram Deora new Udaipur DM

Udaipur: DB Gupta, a 1983-Batch senior IAS officer, has been appointed as the Advisor to the Chief Minister Ashok Gehlot on July 5. Previously, on July 2, amidst a major bureaucratic reshuffle in the State of Rajasthan, Gupta was shifted from the position of Chief Secretary. The transfer order of Gupta

was issued by the Department of Personnel of Rajasthan on July 5 night. Besides this, three more IAS officers were reshuffles.

Anandhi who was Collector of Udaipur has been transferred to Alwar with the same charge.

Kishore Kumar Sharma has been appointed as the new Chittorgarh Collector. However, Sharma is awaiting his appointment. Chetna Ram Deora has been given the charge of Collector, Udaipur.

In a major bureaucratic reshuffle, the Rajasthan government has appointed Rajeeva Swarup as the new

chief secretary replacing D B Gupta and transferred over 100 IAS officers.

The government late on Thursday night released a list of 103 IAS officers, in which health secretary Rohit Kumar Singh was given the charge of home secretary, which earlier Swarup was holding.

Akhil Arora has now being tasked to handle the Medical and health department amid the Covid-19 crisis.

As per the list, three additional chief secretaries, five divisional commissioners and 15 collectors are among those transferred.

Mother's best and closest friend: Dr. Rathore

Mother's best and closest friend Vice-Chancellor said it of Maharana Pratap University of Agriculture and Technology, Udaipur, Dr. Narendra Singh Rathore, in the 14-day e-summer camp for 6-12-year-old boys of university personnel by the Human Development and Family Department of the Community and Practical Sciences College. While addressing the participants, you said that you have a sweet taste from your childhood to growing up.

Sharing experiences, in a very easy and simple way, the children were told the tricks of life, they said happiness within themselves and told them not to run after worldly pleasures. You said that at this age you all have a lot of power and time to put it in a positive direction and achieve life goals. After your parents and teachers, you told the place of friends and told the mother the best and closest friend, guide. With the help of education from successful people, he called for inspiring his own life.

Appreciating the organizer's innovation and initiative, Dr. Gayatri Tiwari, the organizing secretary, and the coordinator, Dr. Sumitra Meena, told the great need to do such programs even further than the scientist of Food Science and Nutrition Department.

The 14-day e-summer camp for 6-12-year-old boys of university personnel was started by the Human Development and Family Department of the Community and behavioral Science College, Maharana Pratap University of Agriculture and Technology University, Udaipur

Dr. Gayatri Tiwari said this was organized for the first time, due to which the needs and capacities of the children of this age group are given. Children of all age groups grew up and grew in it. Due to the internet connectivity work, sometimes faced difficulties, but the special thing was that no child was frustrated or

stressed. Everyone was waiting for each other's turn and also encouraged with warmth.

Every evening Children were told to have an activity related to the topic of the second day, on which they had to prepare. Some examples of the given activity - Why do you get angry? What habits do you feel are good/bad? Your interest What is it? In which genre do you consider yourself talented? Why does Papa scold and Mummy scold? What is the function of the watch? While telling the children the importance of body parts through the story, all the members of the family also explained with the example of the organs how important each relationship is. The negative effects of anger were also told through the story.

Dr. Sumita Meena, Dietary and Nutritionist, and Convener of the program gave a detailed discussion on Dietary Vihar through PPT. Dr. Jyoti Meena of Rajasthan University told the need and importance of positive thinking to children. It may not have been as effective by the screen, yet it was well-liked by the kids. The camp was named Lunar Gossip as it has 14 letters, and 40-minute sessions were held on a single character basis every day. Finally, a competition was organized for the participants according to age. In the concluding session, all the parents were invited and they were asked to give a message to the most participants, which was appreciated. Parents told that by doing online, children have developed skills for activities other than education, the boredom and irritability that was seen in the children due to folk down have come to an end, and the children are premature for this. He used to sit rarely.

He described this program as a cold shade in the hot desert. He said never to use negative knowledge and skills, develop your talent, be the right person, etc. A total of 46 participants attended the camp.

NAAL SAANDOL:

Aravali Herbal Garden

Well known for its dense forest of herbal plants, flat high hills, beautiful valley and several exciting activities for visitors, Nal Saandol has become a popular place. Located about 45 Kms from Udaipur near the highly revered temple of Saandolmata, after which it is named, the eco-tourism spot was famous as a centre of herbal tourism.

As the area represents the extremely rich herbal diversity of Aravali hills with over 1200 varieties of trees, shrubs, creepers, grasses, orchids etc. the Aravali Herbal Garden was established covering 50 hectares in 1996-97 and 35000 herbal medicinal plants were planted. Not only varieties to which the area is home but those from other places were grown here with a view to preserving several rare ones that were in danger of extinction.

In the exhibition section covering three hectares one can see the ecological needs, irrigation and nursery techniques, methods of identification and use of several species in one to two hours.

It takes four to five hours to study the techniques of planting in natural habitat, agriculture and nursery technique, methods of use etc. in production section spread over forty-seven hectares.

Other special features of the garden include Green House where plants are nursed under controlled conditions, herbarium to identify the species, and exhibition section with posters, charts, photographs, books etc. for the facility of learners. There is also a Googal garden and creeper garden.

In addition to these there are Triphla Kunj, Dashmool Kunj, Brahmi Nala, Lemon Grass Hedges and Bamboo section. The fruit section is called Shabri Van.

The herbal garden is especially important for biologists, Ayurved researchers and scholars, folk healers, environmentalists etc. It also helps in creating awareness about environment and the need to protect it.

The garden has turned out to be a boon for the local people who have formed self help groups for the management, safety, parking etc. They provide traditional food and also arrange folk cultural programmes for the entertainment of the visitors. All this has resulted in lucrative income generation for them.

For comfortable stay, there is a guest house, huts and tents where visitors can spend the night in close proximity to nature.

In Kamal Talai, the view of rare blue lotuses is simply awesome.

From the high watching tower, one can have a view of a huge variety of bird frolicking over still water and flowing rivers and enjoy the sweet chirping of the avians.

Also available are facilities of adventure sports like tree climbing, moving from one tree to another and crossing the river over a rope.

It is really a highly exciting experience to have mesmerizing view of nature in the verdant vales and running streams, spend time with beautiful birds and at the same time learn interesting things about herbal vegetation.
