

The First Eco-Friendly Passenger Aircraft Makes Its Test Flight

Another aim of a better future world is fulfilled currently with the successful Test Flight of ZeroAvia's Hydrogen powered Piper M-class 6 seater aircraft conducted in its Research and Development site at Cranfield Airport, England on September 24, 2020. This testing is supposed to confirm the possibility of low and zero-emission passenger flights available for the air travellers in coming time. It adds further scope of development of eco-friendly transportation options run with the help of hydrogen fuel cells reducing the alarming pollution caused by fossil fuels. According to the announcement made by ZeroAvia, this Piper M-class aircraft is world's first largest commercially suitable aircraft ever designed and flown.

Editorial

They've advanced power generating Hydrogen-Electric Powertrain, a special motor that converts liquid hydrogen to electricity using hydrogen and oxygen in the powerchain, which is the part that is used to 'Decarbonize Commercial Aviation'. The company has said that the mechanism of these aircraft for commercial use will have the strength to completing flight distances and payload bearing capacity equalling to the fossil fuel driven air vehicles.

ZeroAvia is running a program called HyFlyer with the project partner Intelligent Energy and the European Marine Energy Centre (EMEC) backed by UK Government in the support to develop carbon-free small and medium sized flying vehicles. After the success of the first flight of eco-friendly Piper M-class aircraft, HyFlyer is thinking to proceed for more ambitious ventures, such as:

Building 20 seater commercial passenger aircraft and EVs for delivery and agricultural works

Test flight of 250-300 mile air trip of Hydrogen powered aircraft, which is a way to ensure commercial suitability of the technology used in these aircraft

Relevance of Non-violence in today's world

It is a matter of pride for us that the birthday of Mahatma Gandhi, the father of the nation, 2 October is now celebrated as non-violence day internationally. Not only Gandhi, the concept of non-violence from Lord Ram, Buddha, Mahavir, Nanak, Dayanand Saraswati and Acharya Tulsi has made India proud. The concept and principle of non-violence is omnipresent in Indian culture. The principle of non-violence reaches family, society and the whole nation. It cannot be limited. All the creatures of the world feel secure and peaceful under the whole concept or feelings of non-violence.

Gandhi gave independence to India on the power of non-violent revolution that is why not only India, his birth anniversary is being celebrated on a large scale as non-violence day all over the world. This is a great proof of Bapu's international acceptance of non-violence. It is a humble tribute to Gandhi in the world. It can also be called the acceptance of the whole world towards non-violence. Neighboring countries, Pakistan and China, should understand the relevance and strength of non-violence and stop promoting war, terrorism and violent incidents on the borders.

Today science has conquered geographical distance. The whole world has become as small as a ball, but on the other hand, there is an occurrence of mental gap between siblings. Due to this contradiction; family, social, national and international life is getting scattered and misbalanced. If non-violence and equality are not widely respect-

ed, then human peace will not be able to find real satisfaction. The Gurus of spirituality have used psychological language to change the mindset of violence and war. They said, to fight is the ultimate religion, but the true warrior is the one who fights not with others but himself, conquering his vices and impulses. The one who assimilates this truth changes all directions in his life. He uses his powers for self-welfare. Violent thinking uses his intelligence and power for destruction. Neighboring countries should think about their own people. Perhaps they never want violence and war.

It is a matter of satisfaction for us that the use of non-violence started from the land of India, the highest institution of the world recognized it as a fundamental formula of life. It is a matter of great pleasure for our countrymen that Gandhi's relevance is increasing miraculously. The world is searching for them anew. To find them means to find solutions to their problems, to find solutions to the growing problem of violence, war and terrorism. Perhaps that is why his ideas are being taught in many universities, research is being done on them. Even today the people of India follow the footsteps of Gandhi and support non-violence. We have been constantly dealing with non-violence with the neighboring country, but they have made the mistake of considering our non-violence as cowardice.

Gandhi has become the most popular Indian of the world today, someone who is watching with surprise and someone with prodigy. Despite

these conditions, their opposition also continues. There have also been constant attempts to prove him to be degenerate, exposing many unknown and dark aspects of his personality, but each time he has grown sharper, his theories have increased even more. By the way, it is a matter of long research that today when the strength of violence and weapons is increasing, the big powers are bent on inciting violence, at that time the power of non-violence is also being accepted. It also seems a little strange that in this storm of capital-centric development, why do we find a person who advocated a self-sufficient economy talking about small capital or small scale production systems?

The question also arises as to what is the belief in the change of heart of man amidst the great tales of the fall of mankind? When arms have become the regulators of the systems then how much effect will the voice of non-violence have? People active in search of an alternative system and life are getting more help from Gandhism. The utility of a non-violent lifestyle has also been exposed in pandemic like Corona.

Today, while the conditions of conflict are prevailing all over the world, everyone is in a position to fight to involve themselves in the race of development, somewhere in the name of community, somewhere in the name of ethnicity, in the name of rights and language. In the name of Gandhi, Satyagraha seems to be the most suitable weapon for the struggling people even in such

complex times. Whether environmentalists or people fighting against their displacement, everyone is getting the light from Gandhiji. Because non-violence is the only weapon in which solutions to all kinds of problems are contained.

From the land of India, there has been a constant voice that India has solutions to problems like the newly emerging corona of the world. This is also said to be because India has a rich heritage of great men like Mahavira, Buddha, Gandhi. The corona epidemic is a lesson in changing the lifestyle, being aware of the environment and nature. We have to be conscious of body, mind, soul and nature. Lord Mahavira says how simple but accurate, "happiness is dear to everyone, sorrow is unpleasant. Everyone wants to live, no one wants to die. Treat us the same way we want towards ourselves." This is humanity and also the basis of humanity. Humanity is in saving, not killing. To kill, bite or torture any human, animal or bird is clearly inhuman, cruel. Violence-murder and blood-mule can never be related to human

values. Values are related to simple superior expressions like 'live and let live'.

Non-violence is essential for coexistence. Efforts to preserve the existence of yourself by erasing the existence of others are futile and ultimately fatal. Acharya Shri Umaswati's famous saying - 'Parasapragraho jeevanam' means that all are partners of each other. Life keeps on moving only through mutual favor. Society and socialism also developed on the same concept of non-violence. In this way, non-violence brings lively, energetic and useful human values like cooperation, mutual support, equity and coordination. From the center to the periphery, the encompassing nonviolence brings joy and positivity from the person to the world.

In the world, human values, degradation of human rights or other problems are prevalent and the only reason for all these problems is 'violence' there is only one solution to all problems is 'non-violence'. Non-violence communicates the great feeling of 'Vasudhaiva Kutumbakam' in

a person. Mankind has endured the horrific effects of war, violence and terrorism, and is always afraid of any kind of danger. There is no better way to save man, humanity and the world than non-violence. From this point of view, Ahimsa Day is a powerful medium to make the whole world aware of the strength and relevance of non-violence.

It is clear that violence shakes the grand palace of humanity from the foundation. When a man kills another, he kills himself, ending his own superiority. Violence triggers an endless vicious cycle of violence. Ahimsa gives abey to everyone and it is creative and prosperous. Humanity was born from the womb of non-violence. All human values flourish, develop and live in the climate of non-violence. In fact, non-violence is the oxygen of human life. It protects and flourishes the whole nature and environment.

Man has made astonishing progress in knowledge of science. But respect for the lives of others has decreased. There were many revolutions, but revolutionary changes were reduced at the level of ethics. There are a lot of discussions about peace, non-violence and human rights in the world, but lack of proper conduct is incomparable. Gandhiji understood these situations deeply and made non-violence the basic formula of his life. Today, if the world celebrates October 2 as Non-Violence Day, then it is not surprising. It is not respect for Gandhiji but it is the respect for his beautiful concept of non-violence.

- Lalit Garg

HDFC Bank launches 'Festive Treats'

Udaipur : After the resounding success of the 1st edition, HDFC Bank today launched 'Festive Treats' its annual financial services dhamaka. Customers can avail of special deals on all banking products from loanst bank accounts, with over 1000+ offers from leading players and over 2,000 hyper local offers through tie ups with local merchants across semi urban and rural locations.

In light of the unprecedented situation due to Covid19, all deals and offers this year can also be availed of digitally from the safety customers' homes, in addition to over the counter at branches, partner stores and dealerships.

On the heels of its Summer Treats festival, the bank expects mobiles, consumer durable, and electronics categories to do well in addition

to apparels, jewellery and dining-in due to the festive season.

Offers will be available across the entire range of financial solutions for retail as well as business customers with discounts on processing fee on loans, reduced EMIs, cashbacks, gift vouchers and more benefits.

HDFC Bank has also tied up with retail brands to offer discounts, cashbacks and extra reward points on both in-store and on-line purchases. Online majors such as Amazon, TataCliq, Myntra, Pepperfry, Swiggy and Grofers will offer special deals during this time. Leading retail and consumer brands like Lifestyle, Bata, Monte Carlo, Vijay sales, Kohinoor, GRT, ORRA are a few big names that will offer up to between 5% to 15% cashback on various products and

services.

With 53 per cent of branches in semi-urban and rural areas the bank plans to take this offering to the most remote corners of the country. It has tied up with hyperlocal stores and kiranas to line up over 2000+ offers at the regional level. The national campaign was launched dig-

itally by Mr. Parag Rao, Country Head - Payment Business, Merchant Acquiring Services and Marketing, HDFC Bank. Mr. Aditya Puri, Managing Director, HDFC Bank graced the occasion.

Speaking at the launch of Festive Treats, Mr. Aditya Puri, MD, HDFC Bank said, "These are unprecedented times. What we have witnessed is that even during this period the people of our country have shown courage and resilience. The launch of #FestiveTreats is our effort to celebrate this spirit of India. Post lockdown we are seeing green shoots. We want to create positivity and boost consumption. We want to be there for our customers and ensure that they have everything they need to meet their demands this year.

Airtel launches Airtel Secure to help businesses tide over rising cyber threats

- PRAMOD SHRIVASTAVA

Udaipur: Bharti Airtel ("Airtel") announced the launch of Airtel Secure – a comprehensive suite of advanced cyber security solutions for business customers. As businesses shift processes to cloud and digital platforms to serve their customers better, they are also encountering increasing incidents of sophisticated cyber-attacks that can come from anywhere and have the potential to severely disrupt operations. India, which is now the world's second largest internet market, ranks fifth globally when it comes to incidents of cyber-attacks and frauds. In fact, the Indian cyber security market is expected to cross \$13 bn* by 2025. Gopal Vittal, MD & CEO (India and South Asia), Bharti Airtel said: "At Airtel, we constantly ask our customers what more can we do to help them in their digital transformation journeys.

Through these conversations, we have heard that cyber security is a critical requirement.

Airtel Secure has been built to serve this need. It combines Airtel's robust network security with cutting-edge solutions delivered through global partnerships so as to deliver end-to-end managed security services. With the incredible trust we enjoy from our customers we believe Airtel Secure will provide our customers peace of mind, enable faster response times to potential threats and help protect their data so as to reduce business risk."

Shriram Super 111 Wheat Seed

increases yield

Udaipur: Farmers from Rajasthan have reported an increased yield through wheat variety, Shriram Super 111 Seed by Shriram Farm Solutions a unit of DCM Shriram Limited. Shriram Farm Solutions has developed innovative research-driven products to enable farmers enhance their crop yield and farm productivity. Since their launch, Shriram Super 111 wheat seed has gained popularity among farmers in various regions in Rajasthan. The variety has been developed by world-renowned wheat scientists at Shriram Fertilizers and Chemicals. Shriram Super 111 wheat seed is popular due to its yield superiority over several other wheat varieties. Along with this, the additional traits of more fodder, shining bold grain and good 'chapati' making quality makes it the preferred choice of seed for wheat in Rajasthan, Maharashtra, Madhya Pradesh and Gujarat.

Bholenath Yogi, a farmer from Bhilwara, Rajasthan, sowed Shriram Super 111 wheat seed in 4 acres of his land after seeing a demonstration last year from Shriram Farm Solutions in the village. He is extremely delighted by his decision as he was able to get 25 qtl/acre yield which is approx 5 qtl/acre more than what he has got from other varieties. This has translated to an additional profit of ₹ 8,000-10,000 per acre. He observed that there is a significant difference in the number of tillers per plant, length of the ear and the grain count (75-80 grains per spike as against 55-60 in other varieties). Even in bad weather, he did not face the problem of lodging in his area last year. He swears by Shriram Super 111 for higher

level of production both in terms of quality and quantity. Farmers from Rajasthan have experienced similar success using Shriram Super 111 wheat seeds. Another farmer Narendra Chaudary from Tonk, Rajasthan had sown Shriram Super 111 in 5 acre of his field. He was able to get 25-26 qtl/acre yield which was 3-4 qtl/acre more than other popular varieties. He witnessed 75-85 grains per spike, higher number of tillering (10-14 per plant) and greater length of the ear. He is very happy about the additional profit ₹ 6,000 he was able to get due to the additional yield in Shriram Super 111. While Shriram Super 111 has been one of the top-picks of wheat seed among farmers in Rajasthan, other varieties developed by Shriram Farm Solutions like Shriram Super 252 and Shriram Super 231 are also equally popular there due to their superior performances in last few years.

D. P. Sharma's life was dedicated to social work: Consumer

Udaipur: Consumer Rights Organisation, Rajasthan condoles D P Sharma, Founder President by offering food to childrens at "Udaipur Mahila Evam Bal Vikas" Hiran Magri Sector 5. In April 2010, D P Sharma and four activist started CRO as they felt some thing needed to be done to improve the situation of the common consumer.

Rajshree Gandhi, State President said Sharma will always be remembered for his dedication and hard work in bringing the organisation on the heights. She further added, the vision of Sharma was every consumer of our society should be aware of their rights as consumer and apart from awareness they must be educated and aware about their duties too. Dr Mahendra Singh Yadav, Vice President shared his experience and time spent with Sharma in past few years and reminded of his

efforts in uniting all states and to work for consumer awareness. Shirish Nath Mathur, Head, State Information Technology expressed his tribute to Sharma and focused on his thoughts towards consumer Education, Awareness and bringing them in routine life of every individual. Manoj Jain, District President also gave condolence to Sharma and said his vision towards society was remarkable. Jyotsana Jain, District Vice President, said it's a big loss to Society he will always be remembered for his contribution. Pradeep Rawani, Vijay Jain, Manisha Jain and Geeta Goswami also shared their feelings and gave tribute to Social Activist and Founder President Sharma. Due to COVID 19 other members of organisation gave condolence through social media and phone calls.
