

Born to Covid positive mother, at barely 30 weeks, premature baby beat odds to survive at Jivanta Children's Hospital

Udaipur: Baby Maya's tale of survival is an extraordinary one. The premie, who was born to Covid positive mother, prematurely at just 30 weeks of gestation [seven and half months] and weighed only 1400 grams, fought for 24 days to survive a stormy course in the neonatal ICU of Jivanta Children's Hospital, Udaipur. Maya and Dev Singh [name changed] from Udaipur married since 18 years were very happy to welcome their baby. But unfortunately whole family came Covid positive.

Everyone was worried about mother and baby. She started premature labour pains and leaking of amniotic fluid at 30 weeks of her pregnancy. The ultrasonography revealed nearly absent amniotic fluid. Couple rushed to private hospitals, but nobody was ready to deliver baby. Mother started with high grade fever and breathing difficulty and got admitted at Covid ESIC hospital, Udaipur on 2/4/21 and as the survival of baby was getting compromised was taken up for emergency caesarean section. Male baby was born weighing 1400 grams. This was very precious and the only hope for the family. This baby then quickly transferred to Jivanta neonatal ICU for further care.

"We got call from patient's father that mother is covid positive and premature baby needs NICU care and wants to shift baby after birth to Jivanta Hospital. To salvage baby of Covid positive mother and that too premature is mammoth task and big challenge before

our team as such kind of babies can not be admitted in routine NICU where other babies can get infected with Covid-19. Our team accepted it and made necessary arrangement as per Covid protocol. We prepared one isolation NICU with separate entry and exit, incubator, ventilator, monitors, etc."

Said Dr Sunil Janged, Chief Neonatologist at Jivanta Hospital. Dr Nikhilesh Nain added, "Baby born this small have extremely poor function of all body organs include lungs, heart, brain, kidney, skin, intestine & all of them need support for survival of baby. This is where skilled & dedicated Neonatologist & Nursing staff

is required, as the margin of error is close to zero. Problems related to any single system can singularly kill the baby."

The baby was managed & looked after at Jivanta Neonatal ICU under precise care of Neonatologist Dr. Sunil Janged, Dr. Nikhilesh Nain, Dr. Vinod, Dr. Amit & trained nursing staff. At beginning baby was struggling to breathe, so was put on respiratory support. His gut was immature & he could not be fed, so baby was put on TPN which means giving all essential nutrients such as protein, carbohydrate by blood. These are some of many problems one faces while managing such babies. Regular screening of heart & brain were performed to rule out any bleeding in brain. Baby required ventilatory support for 15 days.

In all he was in NICU for 22 days, today he is being discharged, on discharge his weight is 1.6 Kg. By far his progress in NICU is satisfactory. Brain is structurally normal, eyes are developing normally.

During this Corona pandemic crisis this little fighter gives us moral boost. It was long & tough journey for me & my team, it is the latest technology, high end expertise of our NICU team, which has pulled this off. In last 6 years Jivanta has successfully treated more than 125 extreme premature babies weighing less than 1000 grams and having more than 90% survival of extremely low birth babies" said Dr. Sunil Janged, Chief Neonatologist at Jivanta Children Hospital.

Saved lives by tracheostomy of Corona positive

Udaipur. To treat the acute Corona-positive patients in the hospital, life is being saved during the Corona by tracheostomy. Nose, Ear, Throat specialist Dr. S. s. Kaushik (ENT Surgeon) and his team have saved lives by tracheostomy of Corona positive patient resident of Udaipur. Dr. S. s. Kaushik said that during Corona, serious patients have to face a lot

of difficulty in breathing. Usually, in most hospitals, the patient is expected to be Corona negative. A tracheostomy is then performed.

In the Paras J. K. hospital, we perform a tracheostomy of the patient while being Corona positive. In this, doctors and other colleagues are more likely to be Corona positive, but the patient's chances of survival and getting rid of

his Corona are increased. By tracheostomy, the patient suffers from shortness of breath. Oxygen reaches directly into the lungs, due to which the oxygen gets depleted, and its lungs are also easily cleaned. This results in a quick recovery of the patient. Dr. Kaushik said that it is risky to do so, but the team has experienced doing thousands of such tracheostomies.

With the state-of-the-art resources available in the hospital, we do it in just 3 to 4 minutes.

Vishwajeet, the hospital's facility director, said that our priority is to save the patient's life. We are always committed to this. In this spirit, we are providing excellent medical services to the residents of Udaipur and the surrounding areas during these difficult times.

Passers sent a message of corona awareness

Udaipur: As per the State Government's instructions, the service work of the Scout-Guide Organization is going on to protect the general public from the Corona under public discipline fortnight. On Sunday, posters-stickers penned a message of corona awareness on the means of movement. They prompted passers-by and workers traveling in vehicles to follow the Covid protocol, wear masks and move out of the house only when necessary work was done.

C. O. Scout Surendra Kumar Pandey said that the Anti Corona Team constituted by the district administration, the Allied Scout Guide Corona Warriors team, is motivating the people to escape the Covid by spreading the message of the Chief Minister across the district.

134 benefited in Corona vaccination camp set up by JAR's inspiration

Udaipur: Inspired by the Udaipur unit of the Journalists' Association of Rajasthan (JAR), 134 civilians over 45 years of age were vaccinated at the Corona Rescue Vaccination Camp organized by the

Hindu Empire Organization on Sunday.

Jitendra Mathur of the organization said that citizens started coming to the vaccination camp at 9 AM at Jyoti Public School in Fatehpura from early in the morning. Sanitizer was arranged at the entrance of the campsite and given the Corona Rescue Guidelines; shells were made at a sufficient distance so that distance could remain among the citizens. The imperative of the mask was also taken care of. Out of 134 citizens, 91 were vaccinated by the first and 43 by the second dose. These included senior journalists as well. All were registered online. There is the availability of covaxine and covishield in the camp so that the other dose does not cause any problem.

He informed that 134 citizens were vaccinated in this camp, which was conducted under the inspiration of the Journalists Association of Rajasthan (JAR) Udaipur till 4 PM. Earlier on the occasion of the morning camp, Jyoti Public School Director Manish Kumawat, Udaipur District President Nanalal Acharya, General Secretary Bharat Mishra, Women Secretary Priya Dubey, Treasurer Gopal Lohar, Media Incharge Harish Navlakha, Member Dinesh Hada, Harish Lohar, Activists of the organizing organization including Bharat Bhushan were present. The citizens of the area also assisted in this camp. On this occasion, Senior Photo Journalist Rakesh Sharma 'Rajdeep', JAR State Secretary Kaushal Mundra, JAR State Executive Member Rajesh Verma greeted the Corona Fighters personnel of the Department of Medicine and Health on their continued services.

Preeti Shaktawat demanded a Covid ward in Bhinder

Udaipur: Because of the rising outbreak of the Corona epidemic in the Vallabhnagar Assembly constituency, Preeti Gajendra Singh Shaktawat, wife of late MLA Gajendra Singh Shaktawat, spoke to District Collector Chetan Deora and District Chief Medical and Health Officer Dr. Dinesh Khariadi about the Corona related problems of the area. Informed, Shaktawat informed the Collector and the Chief Medical and Health Officer about the issue of not coming to Udaipur due to lack of Covid ward in Vallabhnagar Assembly constituency and the problem of not getting empty beds in Udaipur and at the earliest The demand for starting a Covid ward in a 75-bed hospital in Bhinder so that the people of the tehsil area are relieved from coming

Mukesh Madhwani re-elected President

Udaipur: Given the prevailing circumstances of the Corona transition in the country, decided not to hold elections to the Udaipur Bakers Society & to keep the current executive unchanged.

Officials say that in the present circumstances, meeting people together can prove fatal for all of us. In such a situation, there is a need to create social distance as much as possible. Recognizing this initiative and preventive measures, the Udaipur Bakers Society decided not to contest this time but to keep the last year's executive as unchanged as it is.

In the executive committee, patrons Ismail Ali, Yakub Bhai, Brahmanand Guvalani, Virendra Matai, Suresh, Ashok Madhwani, Jagdish Bajaj, Chairman Mukesh Madhwani, Vice President Sanjay Kalra and Sanjay Linjara, Secretary Ritesh Jain, Treasurer Rajkumar Sachdev, Co-Secretary Umesh Matai, Executive Member Narendra Patwa, Ashok Wadhvani, Mukesh Wadhvani, Lalit Purbia, Sanjay Wadhvani, Babu Bhai, Ravi Chaudhary, Vikram Madhwani, Vishal Guwalani, Pawan Jain, Om Prakash Lalwani were re-appointed to their respective posts.

Meeting of officials of Forti

Udaipur: Forti Branch Co-Chairman Praveen Suthar said that the pace of Corona is steadily increasing; in this, a meeting of 32 district branches of Forti was held in Rajasthan under the leadership of Forti State President Suresh Agarwal. Organized a meeting with the officers and traders of the Forti Branch established in each district through a virtual platform to discuss the situation there and provide oxygen cylinders, oxygen machines, and ambulances to help the covid patient at their level in their respective districts. Guidelines for making arrangements were issued.

Suthar said that people are getting oxygen and ambulances on a delayed basis due to the excess of patients. In such a situation, Forti is making every possible effort to help the patients. The current situation is very fragile. In such a situation, business is necessary, but the time for service work is more, so whoever can help spread awareness message.

Forty Udaipur branch president Nishant Sharma said Forti Chief Secretary Girdhari Lal Khandelwal, Chief Secretary Branch Mahesh Kala, Giriraj Niyati, Anil Dhanuka, Dhanraj Chauhan, Naveen Waglecha, Ramchandra Chaudhary, Ravi Sharma, Vinod Aggarwal, Trilok Jindal, Anurag Garg, Pradeep. Sharma the other officer gave his suggestions.

Mavli MLA Joshi dedicated one month's salary

Udaipur: Mavli MLA Dharmarayan Joshi dedicated one month's salary of one lakh five thousand rupees as a personal contribution for the provision of oxygen for the survival of Covid, infected patients in Maharana Bhupal Hospital of Udaipur. Former Councillor Vijay Prakash Vipvi, MLA Joshi's representative, today in the absence of Dr. Lakhan Poswal, Principal of Rabindranath Tagore Medical College. Handed over the cheque to Principal First Dr. A. K. Verma, Principal II Dr. Lalit Kumar Regar, and Financial Advisor Amit Dave.

People are very enthusiastic about Ayush Amrit decoction

Udaipur: As per the state government's instructions, people are consuming Ayush Amrit Kwath in the state Model Ayurveda dispensary Sindhi market with full enthusiasm.

Senior Ayurveda medical officer Vaidya Shobhalal Audichya said that people are consuming decoction in large numbers,

following the guidelines of Covid Guidelines. He said that this decoction is adequate to protect against Corona along with increasing immunity. Created from various Ayurvedic herbs and Ayurveda medicines, like Giloy, Vasa, Kantakari, Haridra, Saunth, Bharangi, Talis Patra, Madhyushthi, Tulsi Panchang, Pepper, Clove, Pippali, Chiraitiya, etc. are the major constituents in this Ayush decoction. Dr. Audichya informed that Dr. Rekha Padaliya, Chartered Engineer Jignesh Sharma, Compounder Pradeep Vyas, Sharda Jalora, Rajendra Jalora, etc., have supported in this service work. The program will continue in the dispensary premises from 9 AM to 12 AM till April 30.

Videos of humanity were seen One and a half million in 2 days

Udaipur: Very few people have sensitivity towards silent animals and birds, and they also show this sensitivity towards them when they get a chance. A video with similar sensitivity is going viral on social media these days, in which there is an incident of saving a small puppy that fell in the Fatehsagar lake of Udaipur during the lockdown period.

during last week's lockdown, Udaipur city photo journalist Tarachand Gawariya was going on the sail of Fatehsagar with his friend that he saw a puppy screaming in the lake. Possibly this puppy fell from the lake rallying. Due to the lockdown, there was no one around who could save the puppy. Seeing the puppy in danger, Tarachand immediately jumped into the lake, threw this puppy out, and gave him life. His friend Yuvraj Malaviya filmed the scene from mobile and later put it on the trending Udaipur page, which is becoming very viral these days.

The video went viral in two days:

This video of about 45 seconds was put on the trading Udaipur page on April 18, and so far, more than 15 lakh 53 thousand people have seen this video, whereas more than 41 thousand have been liked. Similarly, about one and a half thousand comments have been made on this video, and more than one thousand people have shared it. The order to like and share the video continues continuously.

Jeeto Udaipur Chapter Launches Oxygen Bank

Udaipur: The Oxygen Bank was launched on Monday in a simple ceremony organized at Mahapragya Vihar by the Jain International Trade Organization (JITO) Udaipur Chapter as part of its service project. Rajkumar Surana, a philanthropist, chairman of the Udaipur Chapter, said that the current situation is lacking due to the lack of oxygen, and there is no better alternative than the oxygen concentrator machine. For this innovative service project, Kishorebhai Choksi, a respected member of the institution, has provided support of Rs 11 lakh, which will make about 20 machines available to the bank. He informed that this bank had been started with four machines, and about 10 more machines will be received in the next few days.

IIM Udaipur and Moti Foundation will distribute clothing to the needy

Udaipur: "Prayatna," a group of students of IIM Udaipur, has given functional old clothes to Moti Foundation, which the Foundation will distribute to the needy in Udaipur and nearby rural areas.

Ayush, the coordinator of the "Prayatna" group, said that all the students staying in the hostel are going home due to the end of the examination. Many old functional clothes can be helpful for the needy, this suggestion in the IIM and everyone likes it. Aya and started collecting clothes, which was done by the banner of the "Prayatna" group of IIM Udaipur. In this work, the staff and faculty are also fully supported.

Co-ordinator Akanksha said that the President of Moti Foundation Vikas Chhajed approached and provided the garments, the President of the Foundation Chhajed said that all the clothes were washed and sanitized under the covid protocol, after May 3, these clothes will be distributed among the needy.

Vaccination camp organized at UCCI

Udaipur: A three-day vaccination camp was started by the Udaipur Chamber of Commerce and Industry under the joint aegis of the District Medical and Health Department. Vaccination is entirely free. MLA from Udaipur Rural Area Mr. Phool Singh Meena, President of UCCI, Mr. Komal Kothari and Mr. Umesh Manwani of CSR Committee and Executive Member Mr. Kartya Shukla get the vaccinated. On this occasion, Shri Virendra Singh Chauhan of Shakti Kendra Convenor, Divisional Minister Shri Kesulal Dangi, Shri Ram Singh Chundawat, Councillor Shri Poonam Singh Rawat, etc. were present.

Rural MLA Mr. Phool Singh Meena administered the oath to the UCCI office bearers, UCCI members, and industrialists to motivate all their personnel and their families to get vaccinated as necessary.

Chairman Shri Komal Kothari suggested that all employers make every possible effort to get 100% vaccination and get vaccinated; otherwise, they should be immunized by providing as much information as possible at the workplace and their families. Talk about safety.

UMCI Senior Vice President Mr. Hemant Jain, Vice President Mr. Vijay Godha, Honorary General Secretary Dr. Anshu Kothari, Honorary Treasurer Mr. Sandeep Bapna, past president Mr. P.S. Talesera, former chairman Mr. Hansraj Chaudhary, executive member Mr. Achal Agarwal, etc. members contributed to make the camp's success a success.

Due to vaccination in the nearby industrial area, many enthusiasts rushed to get the immunization enthusiastically. On the first day of this three-day camp, 138 persons were vaccinated, in which 91 were first vaccinated, and four were vaccinated. Both Kovaccine and Kavidshield are being vaccinated in the camp.

Mr. Phool Singh Meena said that all industries and commercial establishments of the Udaipur division have to be completely free from the danger of corona infection. The campaign to create awareness for vaccination of all personnel and their families and adopt preventive measures from Corona is a commendable effort of the UCCI, and the administration will extend all possible support for this.

Chairman Mr. Komal Kothari said that the purpose of organizing this camp is to provide vaccination facilities to the employees, workers and their families, and local residents of the member organizations of the Chamber. Shri Komal Kothari informed that the camp will be organized on April 23 and April 24, 2021, so more and more people get vaccinated and take advantage of this camp.

Successful surgery of rare 6-hour baby tracheoesophageal fistula (TEF) in PMCH

Udaipur: Successful surgery of a 6-hour-old newborn baby tracheoesophageal fistula (TEF) done in Udaipur at Pacific Medical College and Hospital gave him a new life. This operation, which lasted for three hours, was carried out by the child and newborn surgeon Dr. Praveen Jhanwar, Dr. Shilpa Sharda of the Department of Anesthesia, and the team deployed.

The newborn baby girl born in Nathdwara was born in a private nursing home at 5 AM, she was immediately sent to the PMCH after the girl's condition was unaffordable. Family members showed Dr. Praveen Jhanwar, a child and neonatal surgeon. After checking, it was found that the breathing tube and food pipe of the girl were connected, which was possible to cure the operation itself. In this operation, the breathing tube of the newborn was separated from the intestine, and the food pipe was made. During this time, the girl was kept on a ventilator for two days under the supervision of Pediatric Critical Care Expert Dr. Puneet Jain and his team and took complete care of her. She was able to recover very quickly.

Pediatric and neonatal surgeon Dr. Praveen Jhanwar said that tracheoesophageal fistula (TEF) is a congenital disease in which the trachea carries air to the lungs, and the food pipe which carries food to the stomach are interconnected. Sometimes during pregnancy, these two tubes do not utterly separate during development and remain connected by a short passage. Due to which the newborn has pneumonia and breathing problems. According to medical signs, this type of disease occurs in one in five thousand children during the developmental process in the womb. Dr. Jhanwar clarified that the excess of water in a woman's womb during pregnancy signifies this disease. If there is a problem like this, delivery should be done in a hospital where a child and newborn surgeons are available.

Distribution of Ayush Amrit in Vaidya Bhavani Shankar Ayurveda dispensary

Udaipur: Ayush Amrit is being distributed in Vardhman Secondary School on behalf of Vaidya Bhavani Shankar Ayurveda dispensary to prevent and prevent Corona and seasonal diseases as per the instructions of the Ayurveda Department.

Senior Ayurveda Medical Officer Dr. Saroj Menaria said that 2043 people had been benefited so far in this decoction program released on April 19 to protect the common person from diseases and increase immunity. Total distribution of social distancing is being done in the distribution work, and people are also being cautioned to take precautions. Bhupendra Kumar, Chapdrakala Arya, Bhagwati Lal Dak, etc., are giving their services in decoction work.
