

Will in the expansion of Rajasthan cabinet become parliamentary secretary based on one person, one post principle, and Chhattisgarh model?

After the meeting of Rajasthan Chief Minister Ashok Gehlot and former Deputy Chief Minister Sachin Pilot with Congress National President Sonia Gandhi, new discussions and many questions have started floating in the political circles whether there is no expansion of the Rajasthan cabinet till Rahul Gandhi returns from foreign trip?

Also, will Gehlot cabinet ministers Dr. Raghu Sharma, Govind Singh Dotasra, Harish Chaudhary, etc., be removed on the principle of one person one post and many parliamentary secretaries will be made in the state on the basis of the Baghel model of Chhattisgarh?

According to media reports, many other unexpected names, including Speaker of

the Assembly Dr. CP Joshi, may also be included in the Council of Ministers. Along with this, former ministers Sachin Pilot, Vishvendra Singh, and Ramesh Meena, who lost their ministerial posts for revolting from the party, will also be resettled?

The trickiest question is about the future role of Sachin Pilot. What will the Congress High Command take in this regard? All eyes are on this.

It is said that now, after Rahul Gandhi's return from abroad, the final seal will be taken on the cabinet reshuffle and political appointments. He is on a tour of Indonesia. According to party sources, he will return to Delhi next week from a foreign tour. After this, Chief Minister Ashok Gehlot can once again come to Delhi and in the course of his meet-

ing with Sonia Gandhi, Rahul Gandhi, Priyanka Gandhi, state in-charge Ajay Maken, There can be a final meeting with the General Secretary of Organization, KC Venugopal etc. regarding cabinet expansion and political appointments. After this meeting, as soon as the High Command gets the green signal, the much-awaited work of expansion of the Council of Ministers and political appointments in the state will be completed, which seems likely to be around the third anniversary of the Gehlot government's tenure on December 17. After the Congress Working Committee meeting in Delhi on October 16, a meeting was held at Rahul Gandhi's residence on the issues of the state. Still, Rahul Gandhi himself did not attend that meeting. Later, Chief Minister Gehlot himself

confirmed this.

Political experts believe that even though Congress President Sonia Gandhi is currently the interim president of the party, most of the decisions in the party are taken only after consultation with Rahul Gandhi as was taken in Punjab in the

past. In such a situation, there is a discussion in the Congress corridors that unless there is a discussion with Rahul Gandhi, cabinet expansion and political appointments will not open in the state. * Possibility of 15 new faces in Gehlot cabinet! CP Joshi can

become Home Minister!

A new development is taking place with each passing day as the cabinet expansion issue is progressed due to the intervention of the Congress high command. With the High Command giving other charges, about a dozen new

ministers were estimated to be included in the expansion. Still, media reports are saying that now three more ministers can be accommodated in the organization. Due to this, there is a possibility that 15 new ministers may take oath at the time of expansion. According to the report, CP Joshi can become the Home Minister. If CP Joshi also joins the cabinet, former minister Dr. Jitendra Singh or Rajendra Pareek can be made Speaker of the Assembly. Along with this, a senior MLA should be appointed as the Deputy Speaker of the Assembly.

The 'Baghel Mode' can be adopted to find a solution to make independent MLAs from BSP and support Congress as ministers. Under this formula, many MLAs can be made parliamentary secretaries, and they will be given ministerial

status by linking them to CM and cabinet ministers. Under the Chhattisgarh model, he can also be made the chairman of various commissions and boards. The motive is clear that the government should run for five full years without any 'interference'. According to highly placed sources in New Delhi, Sonia Gandhi had asked Sachin Pilot to "work as a team" with Gehlot to bring back the Congress in 2023. In fact, less than two years are left for the state assembly elections, and the high command intends that once the BJP and one-time Congress form the government in the state, the trend should be changed and again in 2023 Congress government in the state. The main objective should be to change this practice by making it.

Seven and a half crore people in the country may suffer from diabetes 15 crore likely in next 25 years

Udaipur: On November 14, the birthday of Dr. Banting, the physician-scientist who discovered the insulin hormone used in diabetes, to bring awareness on various aspects of this disease, the doctors, medical community, patients, and their family members related to this disease. Celebrate as 'Diabetes Day'.

MMS Diabetes Trust Chairman and Senior Diabetes and Hormones Specialist Dr. DC Sharma said that at present, seven and a half crore

people in our country are suffering from this disease, and it is estimated that this number will be in the coming 25 years be about two. Times multiply. The diabetic disease manifests in Indian people about 5-10 years earlier than in Europe and America, most of the patients are slightly obese, and despite not having total body fat, abdominal obesity is found in most of the patients, and there is a lack of abdominal fat. Due to excess, not only diabetes but also high

blood pressure and heart diseases are more, and these diseases start about ten years earlier than the British.

He said that people with diabetes are two and a half times more likely to have a heart attack than ordinary people. Heart attacks are more fatal in these, and more people require angioplasty and bypass operation of the heart. Neuropathic lesions or blisters and gangrene due to neuropathy or nerve damage due to diabetes have been seen more in

Indians than in the British.

He said that about one-third of the new patients were found to be below 40 years of age. Most of these young diabetics have been obese, especially the onset of diabetes with abdominal distention. This year, work is being done on the theme of making diabetes treatment accessible to all. Obesity resulting from economic, social, and lifestyle changes in the past years and diseases like diabetes/diabetes, blood pressure, heart attack, etc., have

appeared in the form of an epidemic in our country. Diabetes disease is known as the "silent killer" due to the lack of proper treatment and effective control on time; many complications like heart attack, paralysis, gangrene in legs, retinopathy of eye screen appear, etc., prove fatal to life.

After 5-6 years of diabetes, almost half of the patients are told they need for insulin vaccine due to lack of control by pills, but due to lack of information, ignorance and many misconceptions, most people do not start using insulin on time. In many studies in the country, it has been found that patients start taking insulin after 4-5 years of insulin requirement. Still, by then, the complications related to diabetes have begun in the body, and then even insulin cannot prevent these complications. Would have been

According to the research done in this state division, diabetes disease is increasing rapidly in small towns, towns, and villages due to lifestyle changes. This disease is growing more in those people who have given up working life and adopted a less laborious profession and people who have suddenly started gaining weight.

Due to late diagnosis and delay in starting treatment, complications of diabetes occur in about 25 percent of the patients at the time of diagnosis itself. In our division also, according to the data of other parts of the country, about 85 to 90 percent of the patients are not found to have diabetes under control as per the target.

As a result of research done in the last two decades, many new types of insulin and new medicines have been available. These new drugs have been found helpful in controlling sugar and reducing the chances of heart disease and kidney diseases by preventing patients' weight, blood pressure, and cholesterol. The use of insulin has become easier with introducing new types of insulin and means of taking insulin such as insulin pens, insulin pumps, etc.

Hindustan Zinc was honored with the title 'India's Largest Silver Miner and Refiner' by IGC Excellence Award Committee

Udaipur: The IGC Excellence Award Committee presented Hindustan Zinc with the award 'India's Largest Silver Miner and Refiner' at the Marriott in Jaipur. Hindustan Zinc Limited received the award for their online portal initiative, which enabled silver users to get metal during the most challenging period of COVID-19 led lockdown in FY20 and FY21. Ms. Amrita Singh (Chief Marketing Officer) received the award on behalf of Hindustan Zinc.

To eliminate manual intervention, the company began selling silver spots through an e-auction, giving all the buyers an equal chance to compete and complete price transparency during sales. XXX graced the ceremony.

Eventually, Global Advisory Private Limited and the India Bullion & Jewellers Association (IBJA) collaborated to organize the event. The Indian Gold Conference (IGC) strives to

provide a neutral platform for the gold bullion industry to connect, discuss, and deliberate on the sector's future.

Hindustan Zinc is India's only major silver producer, ranking sixth among the world's top silver producers. The company serves a wide range of markets, including the industrial sector (electrical components, solders and alloys, and pharmaceuticals), as well as jewelry and silverware. The world-class, silver-rich Sindesar Khurd Mine (SKM)

of Hindustan Zinc is India's largest underground mine, with a capacity of 6 million tonnes. In FY21, the company produced the most silver it has ever made, at 706 tonnes, up 16% year over year. Higher output from current and new silver-rich resources and improved process recovery is driving the company's goal of reaching 1,000 tonnes in the coming few years. This will place them in a position to become one of the world's top three silver producers.

Sikkim's Girish and The Chronicles To Perform In Switzerland's UrRock Music Festival 2021

After another globally hit album release 'Rock the Highway' in April 2020, Sikkim's popular Hard Rock Band Girish and The Chronicles (GATC) receives invitation to perform from Switzerland's UrRock Music Festival 2021 commencing on November 11 till 14 of the month this year. Among other top performers, eminent being the sensational early 70's Scottish Band Nazareth, the group will be getting the stage to chant the audience with India's own western music genre. Sikkim is one of the states of our country grooming this long tradition of western music blending a distinctive exclusivity in it.

GATC is a four-piece band having the vocalist-guitarist Girish Pradhan, bassist Yogesh Pradhan, Suraj Karki, the lead guitarist, and Nagen Mongranti for playing drums. They appeared during 2009 in public performances of Hard Rock, Progressive, Metallic Rock and Heavy Metal themes. Currently settled in Bangalore, it is the famed Gangtok based western Hard Rock band and largely reviewed in various online portals, magazines and entertainment stories for their musical expeditions. This band is evolved with their screaming vocals, ground shaking accompanying instruments and the electrifying zeal rewinding back to the 70s and 80s classical Rock eras.

Beyond the floors of India's Rock arenas, such as, MAD Festival, Mighty Rock Union, Bangalore Open Air and more, they have given loads many successful international performances earlier and achieved arrays of prestigious accolades. Like, in 2010 Sun Cane Skale International Music Awards Festival, Montenegro it won silver trophy for their smashing single 'Yesteryears'. To add to this, it paired in performances with Poets of the Fall, Destruction, Steve Vai and such other noted Rock groups. GATC's upcoming foreign shows include the UK's Hard Rock Hell (HRH) Festival at Manchester in 2022.
