

## An Interaction Program with officials, politicians, and businessmen

The positive environment created for the development of industries in the state: Arora

People will continue to join in the journey of Rahul Gandhi; the Caravan will continue to grow.

(Dr. Munesh Arora)

A dialogue program was organized by Udaipur District Industries and Commerce Center at UCCI Office Madi on Saturday, where investors, industrial institutions, and exporters interacted together. After participating in it, the President of Rajasthan Small Industries Corporation, Rajiv Arora, said in a particular con-

versation with the pressnote that Congress is a party based on principles. It has its history. Rahul Gandhi is fighting a battle against inflation and unemployment in the country today. Today every section is suffering from inflation, but no one is listening. Unemployment has become a big problem for the youth. Congress is constantly trying to raise the people's voices against inflation and unemployment so that a large demonstration will be held in Delhi. On the question asked by Rahul Gandhi on the statement that if no one walks together, he will walk alone, Arora said that if Rahul walks, then the people will automatically go on joining. The Caravan will automatically grow as Rajiv is a mass leader. In Rajasthan, Ashok Gehlot entrusted him with the responsibility of the industry department four months ago. I will not let him down, and the

Congress government is taking every step so that more and more investments come to Rajasthan. Every kind of help is given from the side so they do not have difficulty doing their work smoothly and can do their job.

Arora said that he knows the problems of industrialists, so he is making every effort during his tenure as per the hope of Rajasthan Ashok Gehlot that he can solve the problems of industrialists by going there where he is working. That is why we are in Udaipur today, and a dialogue program has been organized. Industries Minister Shakuntala Rawat is also visiting the state.

Here the investors, industrial institutions, and exporters interacted. I was accompanied by Industries Commissioner Mahendra Parakh, Collector Tarachand Meena, RICCO Managing Director Shivprakash Nakate, and

many other officials. During this, the problems of industries, simplification of rules, problems faced in day-to-day work, state-level matters, etc., were discussed in detail.

The progress of MoUs and LoUs concerning investment proposals was discussed in the program. In the meeting, complaints from all the division districts were heard, and dialogues were held with the exporters. Apart from this, everyone was informed about

the state government's concessions and schemes to bring maximum investment.

**Strong potential for industrial development in Udaipur: Collector**

District Collector Tarachand Meena said there is a strong potential for industrial development in Udaipur. He said that even today, there is a great need for employment in the remote rural areas of the district, and the workers here are forced to move to other states.

He informed me about the new agricultural markets in the district. The name Udaipur is one of the top cities on the tourism map of the world.

**G20 summit proposed to be held in Udaipur**

The Collector said the G20 summit is proposed to be held in Udaipur in December, a matter of pride for the region. RICCO Managing Director Shivprakash Nakate said that RICCO is working with a commitment to promote industries

in the state, and RICCO will solve all collective and individual problems. Nakate, while discussing various points and topics related to Rico with the business people who came to the meeting, noted the issues and assured everyone to solve them soon. During this, information about Raj Nivesh Portal was also given. President of Rajasthan Small Industries Corporation, Rajiv Arora, said that under the leadership of Chief Minister Ashok Gehlot, a positive environment had been created for industrial development in the state. In various schemes, schemes have been started to provide interest subsidized loans from banks for the easy establishment of industries and to provide new employment opportunities to all sections of the people. He gave information about Mukhyamantri Laghu Udyog Protsahan Yojana, Rajasthan Investment

Promotion Scheme, Rajasthan MSME Facilitation Council, Mission Be Exporter, Dispute and Grievance Redressal Mechanism, Rajasthan Micro, Small and Medium Enterprises (Facilitation of Establishment and Enforcement Act 2019).

**Arora will soon get the gift of air cargo.**

Arora said that during the program, meaningful suggestions had been received by the industries, on which the government will dispose of them at an accelerated pace. He described the Barmer refinery as necessary for the state. Arora said that traders from other states are moving toward Rajasthan due to the attractive benefits being given by the state government. He appealed to all industries to take advantage of the RIPS scheme 2019. Arora said that Inspector Raj has ended in the state, and soon the air cargo gift will be available to Udaipur.

## The combination of science and the latest technology gave a healthy life to cancer survivors

### Sternum bone 3D titanium implant in GMCH

**Udaipur:** Recently, Rajasthan Government Health Scheme (RGHS) beneficiary, a 30-year-old patient from Pali, was given a successful 3D implant at Geetanjali Cancer Center after a lot of challenges and provided a healthy life to the patient by Cancer surgeon Dr. Ashish Jakhetia, Dr. Ajay Yadav and Anesthetist Dr. Naveen Patidar, Orthopedic Surgeon Dr. Ramavtar Saini and his team.

The patient said that for the last 5-6 years, a knot was emerging in the middle of the chest. Showed the patient to

many bone doctors and took medicine but did not get any benefit. Gradually the problem started increasing, and the routine discharge of the patient started becoming problematic. The patient was brought to Geetanjali Hospital. On his arrival, the patient was shown to the orthopedic surgeon Dr. Ramavtar Saini, at his behest, the patient's 3.0 Tesla MRI. done. Dr. Saini, after seeing the patient's reports, advised his family members to meet Dr. Ashish Jakhetia, the surgeon of Geetanjali Cancer Center.

Dr. Ashish said a long sternum or breastbone is in the middle of the chest, which runs from the throat to the chest. The chest ribs are attached to the breastbone from the front, and the spinal cord is attached to the backbone from the back.

The patient had a tumor of 4 cm in the sternum bone (the bone connecting the ribs). The patient also consulted private hospitals for the last several years, but the patient's suffering was increasing due to a lack of diagnosis and proper treatment. Slowly the lump in the chest was getting bigger.

Dr. Ashish got the patient's biopsy done, in which the cancer tumor was confirmed. All necessary tests were done on the patient, like abdominal CT scan, 3.0 tesla MRI, etc. The patient's all tests were normal; the cancer was in the sternum.

The team of doctors worked out a patient-friendly plan because the sternum covers the clavicle, the middle part of the sternum, and the ribs and is the primary protector of the main vessels, the upper air-

way, lungs, heart, and bones. And gives good strength to the chest wall so the patient can breathe normally.

Dr. Ashish said that under the treatment plan of the patient, the help of an engineer was taken for 3D printing, and he was given all the photographs of the patient. The engineer prepared the segmentation model on the computer as per the doctor's instructions. It is a combination of science and technology. A titanium implant is designed exactly like the patient's sternum. Wherever the bone was to be divided, the implant was planned accordingly. The patient underwent surgery after getting a titanium implant. During the surgery, the bone was removed along with the margin. After this,

this titanium implant was placed.

Dr. Ajay said that before this, bone cement was used with the mesh to make a solid structure, but it could not come so accurately. Through this new technology, surgeries are now done using titanium implants to split hard bone. Titanium does not cause any side effects on the body, even after implant CT. Scan, MRI, etc., tests can also be done. By this, the quality of life of the patient is also good. The specialty of this implant is that it does not break in any way. It is a skillful procedure. Usually, this type of surgery is complicated, and this type of procedure is possible only in the high center of Rajasthan; Geetanjali Medical College and Hospital is also one of them. This patient got

excellent results within a week, and the hospital discharged him.

Dr. Ashish said that bone tumors, jaw bone, jaw bone, or any other bone could be made identical to the bone part through computers through modern technology.

The CEO of Geetanjali Hospital, Mr. Prateem Tamboli, said that with the experienced team, multidisciplinary approach, and state-of-the-art techniques in Geetanjali Hospital, complex operations are being performed on the patients here, which further reduces the risk. This type of high-end operation at Geetanjali Hospital reflects the state-of-the-art approach. Mr. Tamboli congratulated the team that made this operation successful.

## More than one lakh people took oaths for freedom from child marriage

**Udaipur:** On completion of 75 years of independence by Hindustan Zinc, a campaign to stop child marriage on Amrit

Mahotsav, marriage not before 21, freedom from child marriage campaign was launched in which more than 1 lakh people of 550-gram panchayats in 6 districts of the state and

Pantnagar in Uttarakhand rallied Slogans and took an oath of freedom from child marriage in programs organized under the Amrit Mahotsav of Azadi.

Village Panchayats, Schools, Anganwadis, Happiness Centers, Samadhan Project, Sakhi Project, Health Project, Zinc Football Center, Shiksha Sambhal, and Vedanta Foundation run the programs organized by the Village Panchayat in the vicinity of Hindustan Zinc Operations.

The public representatives administered the oath and the school's principal to the community present. Giving information to the community, the guests said that out of child marriages in the country, 28.3 percent were in rural areas and 15.1 percent in urban areas of the state, which is a matter of concern. Child marriage denies a child the right to good health, nutrition, and education. It is believed that girls face more violence, abuse, and harassment due to early marriage. Early marriage has a physical, intellectual, psychological, and emotional impact on both boys and girls, reducing opportunities for education and poor personality development. However, boys are also affected by child marriage. But it is an issue that affects a large number of girls. The government has worked towards curbing this practice in recent years by introducing the Prohibition of Child Marriage Act. Being a responsible industry, Hindustan Zinc has taken this initiative to make everyone aware of the prevention of child marriage and to play its role in preventing it. In which he took a vow not to do child marriage or not to participate in any such event. Hindustan Zinc's program partners Vidya Bhavan, NDS, Sewa Mandir, The Football Link, Jatan, GSVS, Manjari Foundation, BAIF, Ambuja Cement, Sriшти, Tata Strive, Resonance, Kosvi, Deaf Vidyalaya, Care, Deepak Foundation, in making the event a success. She was supported by Wockhardt Foundation, Vedanta Foundation, Hanuman Van Vikas Samiti, and Young Munk.

## Andaz-e-Azad performance

**Udaipur:** The famous play Andaz-e-Azad was successfully staged in the packed hall of Mohanlal Sukhadia Theater Auditorium. This exemplary performance by the artists of Natya Kiran Manch, Mumbai, captivated the auditorium. Patriotic slogans infused enthusiasm in the audience after a long time of seeing such a perfect presentation. The auditorium resonated in the hall with unceasing applause when the public's silence broke at the end of the play, which lasted for about a hundred minutes. Even at the end of the play,

people sat and listened to Dev Fauzdar, the writer and director of the show. They explained the journey of this play based on the life of revolutionary hero martyr Chandrashekhar Azad.

The background music in the space was initially given by Jayakara, a Udaipur Hall, Mumbai resident.

With this, Singhvi said that all the play's actors did full justice to their characters instead of providing convenient laundry service. Avneesh Nandawat played the main character of the space, a chartered accountant originally from Udaipur presently in Mumbai. He won the love and support of the audience by bringing alive the biography of Chandrashekhar Azad through the performance of his character.

The 22nd show of Chandrashekhar Azad's play was organized in Udaipur. The show's main sponsors were Wonder Cement, Archies Builder Group, Sojatia Jewellers, Neerja Modi School, etc. The program's special guests were Kiran Patil, Managing Director of Wonder Cement, Director Parmanand Patidar, President of Innerwheel Club, Rashmi Pagaria, Senior Chartered Accountant Nirmal Singhvi, and Ankit Agarwal of Geetanjali Group were present. All the artists were also honored by the Innerwheel Club.

## National Seminar on Role of Innovation and Technology in Turnaround of Mining Industry concluded.

**Udaipur.** State Revenue Minister Ramlal Jat said that the Government also pays attention to the brainstorming done in this seminar on the innovations happening in the mining sector in the country and the world. The world's best technology in the mining sector is brought to India and Rajasthan so that more revenue can be obtained at less cost and less loss.

He was speaking as the chief guest on the third and final day of the national seminar organized under the aegis of the Mining Engineers Association of India, Rajasthan Chapter, Udaipur, and Hindustan Zinc Limited.

He said mining is the backbone of the economic situation but is given less attention. In contrast, mining is the only sector after agriculture in Rajasthan, where more employment is available.

He will send the recommendation sent by the Mining Engineers Association of India to the Chief Minister and Mines Minister for the innovations being done in the mining sector for the development of mining. Mining has made a considerable contribution to the country's strength and growth. There are 10-12 such minerals in Rajasthan which have a monopoly in India. The state government has also made many changes in the mining policy, due to which today, along with the development in the mining sector, there is a tremendous increase in the revenue in the mining department.

On this occasion, the special guest of the function, RSMML Director Akhilesh Joshi said that mining is a vast research area. Where you get to learn something new every day. Natural resources are nothing without metals. We should leave as much metal as we can in the ground. Mahesh Mathur, the special guest of the function, Additional Director, Department of Mines and Earth Sciences, said that mines are not seen on good terms in society. We need to change this image. How to do mining while keeping the environment safe is a challenge for us. The annual revenue of the Mines Department has increased to Rs.6 thousand crores, whose target for the year 2022-23 has been kept at Rs.8 thousand crores. Such rules have been changed, and the mines being closed in 2025 will now be completed in 2040.

Former MLA Pradeep Kumar said that Rajasthan is a state of minerals, and there are possibilities for more mining here. Retired

Labor Commissioner, Government of India, SC Joshi, said that if industries are not encouraged in any country, then the economic condition of that country will not improve. The use of technology is decreasing here. Technology is necessary with technology, and staff will increase with skill development. The Government is also making efforts for skill development. The Government has made many changes in the rules for industrial development. Twenty-eight crore people are working in the organized sector in the country. The Central Government is making efforts in this direction that all the states should implement the labor laws made by the Government of India so that the same type of labor laws should be implemented in the country.

Recommendations will be sent to the Government- Former National President of MEAI, Arun Kothari, said that the committee of MEAI has prepared the proposals to be sent to the Government on the last day of the seminar so that the Government can implement them and develops the mining sector and changes the mining policy.

Kothari said Rajasthan is the only state in the country where potash is available, but its production is zero here. We have to import potash. Changes are required under the policy of exploration in deep deposits. There are a lot of flaws in the rules of Explosives. Which should be changed. Tax entry should be made in the land revenue record so that after surveying the land containing mineral bearings, take a no-objection certificate from the Government so that that land is used only for mining and not for other works. In the skill sector, the Rajasthan government should cooperate with MEAI so that this organization can do great work in the skill sector. The closing ceremony was also addressed by K. Madhusudan Rao, National President, MEAI.

Initially, while welcoming the guests, Organizing Secretary Praveen Sharma said that the subject expert read 40 papers in this seminar. He said that the suggestions prepared by MEAI would be sent to the Government. Ninety-five minerals are produced in the country, and all these minerals are available in Rajasthan.

## Diagram Saharan, the newly appointed President of Rajasthan Sahitya Akademi, assumed office

**Udaipur:** Diagram Saharan, the new President of Rajasthan Sahitya Akademi, has said that Rajasthan Sahitya Akademi will work continuously towards uplifting literature and respecting litterateurs.

Akademi President Dularam Saharan, Saraswati Sabha member Mithanath Mitesh Nirmahi and member Kishan Dadhich took charge on Wednesday. Saharan said that he would live up to the intention of Chief Minister Shri Ashok Gehlot during his tenure. He said that the Akademi would honor the personalities who have been working in the direction of literature for years and have dedicated their lives to the field of literature. On this occasion, RD Saini, former chairman of Rajasthan Public Service Commission and former chairman of Hindi Granth Academy, Mithanath Mitesh Nirmahi, and Kishan Dadhich, members of Saraswati Sabha, also expressed their views. On this occasion, Secretary Basant Singh Solanki, Hindi Granth Academy Director BM Saini, and other officials were present.

**Welcome to Mahatma Gandhi Jeevan Darshan Samiti**

Under the leadership of District Convenor Pankaj Sharma, District Level Mahatma Gandhi Jeevan Darshan Samiti, the newly appointed President Dularam Saharan was welcomed. During this, Sharma presented his magazine Pratyush to the President. Co-convenor Sudhir Joshi, Vishnu Sharma Hitachi, Dr. Sandeep Garg, Rajveer Meghwal, Ashok Chaudhary, Mahesh Meghwal, etc., welcomed the chairman. On this occasion, Dr. Vimala Bhandari founder Salila Sanstha Salumbar, Pankaj Sharma, Dr. Jyotipunj, Vishnu Hitachi, Govind Mathur Jaipur, Kundan Mali, Chetan Audichya, Shivdan Singh Jolawas, Dr. Shakuntala Saruparia, Sri Krishna Jugnu, Dr. Girishnath Mathur, Umadi Gothwal, Dr. Krishna Jakhar, Dayapal Singh Poonia, Sudhir Joshi of Gandhi Darshan Samiti, Prof. Dr. Mahendra Dhaka, Pushpa Punia, Dr. Madhu Aggarwal, Shri Krishna Mohta, Rekha Kharadi, Gaurav Dwivedi, Dr. Narendra Nirmal, Swati Shakun, Dr. Tarana Parveen, Reena Menaria, Ramdayal Mehra, Ashok Manthan, Khurshid Sheikh, etc. were present.

## Save the Girl Child Brand Ambassador Dr. Divyani honored in Thailand

**Udaipur:** The brand ambassador of Save the Girl Child Udaipur and the country's first tribal model Dr. Divyani Katara of Gundighata, a small village in the Seemalwada subdivision

of Dungarpur district, has been honored at the international level in Thailand. Dr. Divyani also participated as a special guest and judge in the Thailand international competition.

Dr. Divyani is honored by Fashion Choreographer and Honor Sree Kumar of Padmavati Production, Mrs. Universe Rupal Mohta, Pradeep Pali of Barkat Productions at Daiichi Tree-Tone Hotel for various service works, including women's employment, child education in the tribal area she was. she was honored by wearing a crown at the hands of the guests including Mr. Anshuman. Dr. Divyani said that we have to change the thinking that we are tribals, and the day we change this thinking, no one can stop us from reaching success in any field. Instead of feeling backward, consider yourself at the forefront of the race to develop India.

She dedicated this honor to the tribal daughters of the country. It is noteworthy that the Miss and Mrs. World 2022 pageant was organized by Enigma Event Management in Pattaya, Thailand. In this pageant, beauties from 30 countries, including UAE, Canada, India, Thailand, Japan, Colombia, South Africa, Australia, UK, and Belgium, participated in many rounds, including Talent Round, Introduction Round, National Costume Round, Swim Round, Walk Round, Grooming Session.

Crossed. Dr. Divyani made the name of Vagad-Mewar proud by participating as a judge in this competition.
