

How Music Disarmed Dialectics: Melville, Emerson and Contemporary Composers

Udaipur: The Department of English, Mohanlal Sukhadia University organised two extension lectures. Dr Pawel Jedrzejko – President, International American Studies Association spoke on- "How Music Disarmed Dialectics: Melville, Emerson and Contemporary Composers"

Dr Pawel spoke about the need to try and understand how we encounter reality. According to his insights, there are those

moments when we immerse in reality and we are so in the rhythm where everything gets blended. We see things around us when we experience something.

Some of the main points that he raised are:

- 1) Language being secondary as compared to experiences.
- 2) We don't think about the semantic meaning after a moment when we get

immersed in reality.

3) With the intensity of the change there are moments when we start questioning the very existence and the reliability of the discourses, even those of Christianity, when faced with the reality of World war that signified failed attempt of understanding what human life means.

The second Speaker- Dr S. Bilge Mutluay Cetintas – Department of American

Culture and Literature, Turkey spoke about "Drawing Life: American Women

Artists/Writers"

She talked about a new evolving genre that writes about life while also drawing graphics.

Main points that she discussed in the session:

- 1) Besides writing we need to draw in order to convey the myriad nuances of life experiences.
- 2) Graphic Life Narratives- A Hybrid form of mixing verbal and visual, Ocilla [tmg]

between different planes of representation, is a mode that is more in resonance with the reality of life.

3) what you choose to draw and what you don't draw, both are equally important in order to express and communicate.

4) There are certain spaces in the creation that encourage the reader to contemplate and to fill in the frame with their own imagination.

5) She gave example of

Lynda Barry's One Hundred Demons to illustrate the graphic life narrative.

6) She mentioned the term Autobiocfictionography in that context.

This session ended with the address of Prof. CR Suthar, Dean of University College of Social Sciences and Humanities.

Later Prof. Pradeep Trikha took over the stage for Vote of Thanks.

Children below 5 years could be 7 times more at risk of hospitalization because of flu

Udaipur: The Indian Academy of Pediatrics (IAP) and the World Health Organization recommend annual vaccination for children between the ages of 6 months and 5 years. Children are vulnerable to the flu throughout the year especially during the winters and monsoons. It may take about 2 weeks to develop antibodies after getting the vaccination, which is why it should be taken 2 to 4 weeks before the monsoon or winter. Children under 5 years are not only at a higher risk of complications from the flu but can also spread the infection to others in the community.

Speaking about the need for Annual 4in1 Flu vaccination, Dr Manoj Agarwal, Consultant Pediatrician, Magnus Hospital says, "Flu is a viral infection that can spread quickly from one person to another. Young children are at a higher risk of developing severe symptoms of flu which can also cause other serious health problems for them. It is advisable that children between the ages of six months and five years receive the annual 4in1 flu vaccination to protect them from flu."

Flu is caused by the influenza virus, and it affects the

nose, throat, and lungs. Some common symptoms are cough, fever, chills, sore throat, tiredness, muscle ache and headache. The virus can spread easily from a sick person when they speak, sneeze,

or cough. Respiratory droplets that contain the virus can directly reach healthy people, or indirectly if they fall on surfaces e.g., the door that is then touched by someone who is not sick. Many recover in a few days or weeks. But children under the age of 5 years, especially those who are under 2 years; and those with long-term medical conditions may sometimes become very sick with the flu and need to be hospitalized. Children may have serious complications such as pneumonia and bronchitis because their immune system is not fully developed. Studies show that 11% of out-

patient children under 5 years of age with acute respiratory infections had flu in India. The mortality rate because of influenza is also high in children below 5 years of age. Nearly 10 out of 1,00,000 children can die because of influenza in India.

There are many flu viruses that can cause infection. One amongst these is the H1N1 virus which is a type of 'swine flu' virus. 4-in-1 flu vaccination can help protect against most common four variants. These strains keep changing constantly. So, Flu vaccination is reviewed every year and it may be changed,

depending on what viruses are causing the disease. For this reason, and because protection from the vaccination may reduce with time, it is recommended by health experts that children get vaccinated once a year.

The IAP recommends that children who suffer from chronic heart disease, respiratory disease like asthma, diabetic conditions, immunodeficiency (like HIV) or other chronic conditions are at higher risk of contracting flu and should get the annual flu vaccination even after the age of 5 years. Parents should consult their paediatrician to know more.

Udaipur's player Pushpit Chayal won the medal for the country

The youth of our country are making their name famous in many sports not only in the country but also abroad. They won 28 awards for the country in the International Championship of Jump Rope. Out of 800 players from 8 countries, players from India and Udaipur did their best.

Indian team manager Kuldeep Singh Rao said that the Jump Rope International Championship 2022 was held in Bangkok city of Thailand, from 19 to November 23. A total of 800 players from 8 countries, India, Pakistan, Hong Kong, Singapore, Malaysia, Thailand, Korea, and Kazakhstan, participated in this competition. A team of 55 players from India participated in three categories Junior, Sub-Junior, and Senior, and won a total of 28 medals, including 17 Silver medals and 11 Bronze medals. Kuldeep Singh Rao said that Udaipur's player Pushpit Chayal, a student of Rock Wood School, also participated in winning the medal. India was also honored with the Fair Play Team Award. Secretary of Jump Rope Federation of India, Shahzad Khan, assured that South Asian Championship would be organized in Dhaka city of Bangladesh in April, where the Indian team will also participate. Let us tell you that Kuldeep Singh Rao is the Indian Team Manager and the Vice President of Rajasthan Jump Rope; how many times did he and his team earn medals for Rajasthan State in National Tournament and India in International Tournament?

Matki hai Gazab

Udaipur: Checking the water purity at Gandhi Bal Vidya Mandir Higher Secondary School Gandhi Ashram, Khempura, Udaipur, Water Hero Dr. PC Jain said that Matki is a beautiful utensil that can reduce the increased T.D.S. and increase the decreased T.D.S. It can grow in the sun and shade, which means pot water is the best.

T.D.S. test-The T.D.S. of the water brought by the students from their respective homes was tested 57 such samples were taken for water out of which T.D.S. of some came above 900 which was of a borewell; some of the samples, 36 to 74 which was either of the camper or any aro, but most of the sample came between 242 to 255 and on finding out it was known that it is tap water which is of Khempura area. Low T.D.S. means below 100 TDS water is harmful to the body, so it is advised to increase it, the best T.D.S. is 350, but 230 to 500 TDS is fine.

Use of Waste Best - In the second session, he talked about the use of Waste Best and urged him to lay coconut shells around every tree so that water can be saved and plants do not have to be overwatered.

Utensil soap - In the third session, he urged us to use such soap for washing utensils which contains lemon and ash.

Fluorosis - In the fourth session, he showed the physical effect of increasing fluoride by demonstrating the yellowing of teeth due to fluoride, not being able to take both hands back to the top, and not being able to bend the neck.

Plastic Bottle - Microplastic water dissolves on keeping water in it for a long time, which is harmful. Dr. PC Jain was welcomed by Dinesh Sharma and thanked by Priyanka Sharma. School Principal - Mrs. Priyanka Sharma, and Vice Principal - Mrs. Sunita Rathore were also in the program.

Present teachers- Mrs. Kavita Sharma, Mrs. Meena Vaishnav, Mrs. Sunita Chauhan, Mr. Vishnu Lal Ji Rebari, and other teachers were present.

-Dr P C Jain

Just an eight-year-old child get rid of a Cataract at Geetanjali Hospital

Sudesh Singh (name changed), an 8-year-old child patient from Udaipur, could not see correctly for the last four months. Her parents brought GMCH for a check-up.

Dr. Rishi Mehta, Dr. Esha Shah, Dr. Alokita Sharma, Nurse Taruna Mali, and the team successfully performed a cataract operation and lens transplant of the patient. After examining the child's eye, Dr. Rishi Mehta said she had a cataract problem. He advised the parents of the child to get the operation done.

Ophthalmologist Dr. Rishi

Mehta said that during the operation, the patient resolved two serious problems

1. Cataract Removed
2. Lens implanted

Dr. Rishi said that the problem of cataract is often seen in old age; cataract is rarely seen in children at such a young age. If this disease occurs in young children, it is necessary to diagnose it as soon as possible. The patient's eyesight has returned; she can see usually, and the patient's family is pleased to have a healthy child. The patient has been treated free

of cost under Geetanjali Medical College and Hospital.

All advanced techniques and resources are available in Geetanjali Hospital's Ophthalmology Department, due to which complex to complex problems are being solved

Successful treatment of 4 patients who have cancer in Paras Hospital

Udaipur: The oncology team of Paras Hospital, Udaipur, has successfully started cancer treatment. Three female patients aged 70 years, 56 years, and 60 years have been successfully treated for breast cancer in Paras Hospital in the last two months.

Dr. Subhabrata Das, Cancer Surgeon at Paras Hospital Udaipur, said that the size of a tumor in the breast cancer of two patients was 2 cm, and clinically the extent of the tumor in the breast cancer of one patient was 3 cm. A multidisciplinary board counseled all three patients, and all three decided in favor of the modified radical mastectomy (MRM) procedure over breast conversion surgery (BCS). Patients were discharged in healthy condition two days after the successful operation. At the same time, an 83-year-old male patient with breast cancer was also operated on successfully, which was clinically 3 cm. The patient underwent Modified Radical Mastectomy (MRM) and is currently undergoing chemotherapy.

Historically, a modified radical mastectomy has been the primary breast cancer treatment method. Modified radical mastectomy is a procedure in which the entire breast is removed, including the skin, areola, nipple, and most of the axillary lymph nodes, but the pectoralis major muscle is left. There is a shallow risk of cancer recurrence as 95 percent of the breast tissue is removed. Breast reconstruction is sometimes necessary after mastectomy or breast cancer surgery so that she remains emotionally intense and considers herself normal like others. In most cases, other treatments are required, along with radiotherapy.

Breast cancer is when breast cells begin to divide, grow, and spread uncontrollably due to changes in specific genes. Dr. Subhabrata Das, Cancer Surgeon at Paras Hospital Udaipur, said that every year many cases of breast cancer are reported in women in India. The average rate of breast cancer in India is 16% to 29.9%. Breast cancer accounts for 18.1% of cancer deaths worldwide. Breast cancer accounts for about 15 percent of cancer deaths in women.

At Paras Hospitals, we provide comprehensive surgical treatment, including breast surgery, oncoplastic techniques, and breast reconstruction. We also provide chemotherapy and chemotherapy ports so patients can get better treatment.

Abid Tauqueer, Facility Director, Paras Hospital, Udaipur, said that Paras Hospital Udaipur is committed to world-class cancer treatment. We have state-of-the-art medical, cancer surgery, and chemotherapy treatment facilities, and in a year,

we will also have radiation oncology, thereby providing comprehensive cancer care at Paras Hospital. Almost all top-class treatment services are available in Udaipur, so people may not need to travel to other metro cities for comprehensive cancer treatment.

Workers showed enthusiasm in the Indira Gandhi Urban Employment Guarantee camp

Udaipur: As per the instructions of District Collector Tarachand Meena, camps are being organized by the Municipal Corporation at different places in the city to inform the laborers of Udaipur about various government schemes and benefit them. On Friday, an Indira Gandhi Urban Employment Guarantee Scheme camp was organized near Joganeya Mata Temple outside Kishanpole City Station. T

he chief guest of the program was Jagdish Raj Shirmali, vice-chairman of the Rajasthan Labor Welfare Advisory Board. It was presided over by District Collector Tarachand Meena, and the special guest was Kuldeep Sharma, Secretary, District Legal Services Authority, and Additional District Sessions Judge. Workers participated enthusiastically in this camp organized under the joint aegis of Municipal Corporation, Labor Welfare Department, INTUC, Jag Vidya Trust, Aravali Nirman Mazdoor Suraksha Sangh, and Jan Daksha Trust.

District Collector Tarachand Meena said that a maximum number of needy workers of the unorganized sector should register their applications in the Urban Employment Guarantee and start work as soon as possible; after joining the employment guarantee, they will get the benefits of all the schemes of the government. Chief Guest Jagdish Raj Shirmali said that the most extensive system of the Rajasthan government is employing urban people through employment guarantee. Workers are directly connected with the schemes by organizing camps in the raw settlements of the Municipal Corporation area. This is a commendable effort. Expressing his views, Kuldeep Sharma, Secretary District Legal Services Authority, said that the District Legal Services Authority provides free legal aid to the people living on the poverty line, and the legal service is always ready to protect the rights of the citizens.

Camp convener Saurabh Gupta said that a maximum number of unorganized sector workers are linked with employment by making Indira Gandhi Urban Employment Guarantee job cards. In the same sequence, e-labor cards are directly connected by the Government of India in the camp, under which a security insurance scheme of up to Rs 2 lakh and a loan scheme under the Indira Gandhi Credit Scheme to start the industrialization of needy people.

Induction Program @MLSU Deptt of English

Udaipur: The Department of English, UCSSH, ML Sukhadia University, organized 'Aarambh: Student Induction Program' for the students of the department. The program commenced with the Kulgeet. Dr. Minakshi Jain, Head, Department of English, welcomed the guests and introduced the event formally. The program was presided over by Prof. Pradeep Trikha, Associate Dean of University College of Social Sciences and Humanities and the Chairperson of Humanities. The program was graced as the Chief Guest of the event by Prof. Hemant Dwivedi of Visual Arts Department. In his address to the students,

Prof. Dwivedi gave his views on the need of such induction programs to the students and expressed concern about the reducing popularity of literature and art subjects among students as compared to the other subjects in the changing times. Describing the importance of Humanities and its subjects, he said that these subjects create and instill human values. He said that we are forgetting to 'read' and 'see' and for this the need for contemplation. In the program, Insiya Attari and Fatima Sanwari of the second and the third year of English Honors read self-composed poems, and Gautam Suthar, Jigyasa and Drishti Pant did storytelling. Maheep Palwal of second year Honours rendered a song. Niveera Soni of Hons I year told a few interesting facts related to English language.

The chairperson of the program, Prof. Pradeep Trikha, addressed the gathering and said that art and literature give us techniques to live life and this is the intrinsic value of humanities. The day marks its importance for the Department as Prof. Trikha laid the foundation of the Literary Forum for the students and informed that a newsletter will also be brought out by the Department under the forum and the information of the same will be given to everyone soon.

As a special guest of the program, Dr. Shahid Parvez from the Department of Visual Arts, interacted with the students as the students showcased the posters made by them. Dr. Parvez appreciated their efforts and inspired them to see literature as a form of art. The program was compered by Jasneet Arora and Rukaiya Moomin of III year. In the end, the program coordinator Dr. Bhanupriya Rohila extended a vote of thanks to everyone.

Dr. Deepak Kumar Shrivastava is among the top ten Next-Generation trailblazing public librarians of the country

India's most Popular and future ready Indian Public Librarian Dr Deepak Kumar Shrivastava Name is considered in Top ten next generation trailblazing public librarians of the country in the Coffee Table Book named "Trailblazing Indian Librarians Transforming Communities" carried out by MS Swaminathan Foundation (MSSRF), International Network of Emerging Library Innovators (INELI) India and South Asia and Bill & Melinda Gates Foundation.

Its worth mentioning that INELI South Asia Mentor Dr. Deepak Kumar Shrivastava is currently working as Divisional Librarian and Head in Government Divisional Public Library Kota Rajasthan under Department of language and Library Government of Rajasthan.
